Activity Report of Publish or Perish

Activity Report

Title: Publish or Perish

Objective: To develop participants' knowledge, skills and self-confidence regarding publishing.

Date: 3rd-19th November 2021

Time: 3 p.m.-5 p.m.

Location: The Oxford Dental College, Bangalore

Organized by: Department of Periodontology

Audience: Post Graduate students

Speaker: Dr. A. R. Pradeep

Method adopted: Lecture, hands on experience and live demonstration

Materials used: Power point presentation, pamphlets, flyers, banner, back drop and videos

Description:

Writing scientific articles is a craft requiring years of practice to master. Some would say it is a lifelong training process. It enabled students to learn about principles of publishing, how to organize material, the different types of papers. The speaker, Dr. A. R. Pradeep discussed the most important concepts such as publication strategies, what makes a good manuscript. The event was conducted between 3rd-19th November 2021 and was well appreciated by the PG students and interns.

BOMMANAHALLI, HOSUR ROAD, BANGALORE-560068

DEPARTMENT OF PROSTHODONTICS and CROWN & BRIDGE

Activity Report

Title: Stress management during examinations.

Objective: To learn about dentistry related physical problems and their solutions.

Date: 07/10/2021 to 14/10/2021

Time: 3:00 – 5:30 pm

Location: The Oxford Dental College, Bangalore

Organized by: Department of Prosthodontics

Audience: First year BDS

Speaker: Dr. Ravi Ranjan Sinha

Method adopted: Lecture, hands on experience and live demonstration

Materials used: Power point presentation, pamphlets, flyers, banner, back drop and videos

Description: Dr Ravi Sinha, Reader, Department of Prosthodontics, conducted a course on Stress management during examinations which is the study of people in their working environment. It dealt with task, technology and surrounding relation of human stress. The stress hazards caused by examinations preparation, strained posture and prolonged repetitive movements can induce Musculoskeletal-disorders. This course designed to help students because, they are exposed to different stress physically, chemically and biologically. The course helped in the harmful postural habits and early stress sign recognition. Ultimately from this course we gained knowledge to redesign work to enhance satisfaction, comfort, morale, fulfillment, to eliminate discomfort and risk of injury due to examinations.

Description:

The Department of Oral Pathology and Microbiology, Oxford Dental College conducted a Value-added Course on “Museum Techniques” from 6/12/2021 – 15/12/2021. A total of 20 students enrolled in the course. The scientific session was conducted by **Dr. Leeky Mohanty** and a series of lectures were taken.

Pathological museums are in part historical, representing the pioneering work of diagnosticians and therapists; in part they are becoming museums in the generally accepted sense of the word, presenting records of past states not now encountered,

Website: www.theoxford.edu

or conditions of great rarity; and finally, they provide the student with the basic material of his current teaching.

The museum technique involves reception, preparation, fixation, restoration, preservation, and presentation. Specimens may come from a number of sources like hospital operation theaters, postmortem rooms, or research laboratories. It is necessary to make accurate records. Medical museums are institutions that store and exhibit objects of historical, scientific or conditions of great rarity that has a link to medicine or health. Medical museum specimens are used as a visual undergraduate and postgraduate teaching aid.

Specimens in the older medical museums were mounted in glass jars which were originally cylindrical in shape. There are a number of stains that are used to demonstrate the presence of normal or abnormal constituents in tissues to be mounted in a museum jars, examples of these stains are: iodine or Congo Red; Perl's Prussian Blue; Sudan IV or Scarlet R and Alizarin Red S. There is still no substitute for well dissected and mounted specimens that can be used for medical exhibitions, examination vivas, lecture demonstrations as well as self-teaching aid for both undergraduate and postgraduate students in Histopathology.

During the course, students actively participated and were briefed about the basics of museum setup and its relevance as discussed above. This was followed by the Valedictory function. The proceedings of the course ended on 15/12/2021. The Organizing committee from the Department of Oral Pathology and students who participated were appreciated for all the efforts put to make the course a grand success.
