1. Comprehensive/ Integrated clinic

1. **Title:** Comprehensive Dental Care Clinic
2. **Objectives:**
 - a) To train the post graduate students and interns in planning comprehensive dental care to patients
 - b) To provide co-ordinated treatment with proficiency in clinical and technical procedure with an interdisciplinary perspective
 - c) To train the students on communication and patient management skills
 - d) To train the students in maintenance of patient records

3. Beneficiaries:

Post graduate students of all departments

4. Mode of training:

Didactic method with MS PowerPoint presentations, demonstrations and hands-on exercises

At the commencement of clinical posting of the students, the case history taking was taught through didactic method of teaching using PowerPoint presentations followed by group discussion among the students. Various case scenarios were discussed and doubts were clarified. Steps in planning comprehensive treatment plans were elaborately discussed and debated based on evidence-based dentistry. Subsequently, the students were asked to demonstrate their skills patient management, communication and case history taking. All the treatments were carried out under the direct supervision of the specialty faculty, and faculty of Public Health Dentistry.

Comprehensive Dental Care Clinic

The definition of comprehensive dentistry is a concept that includes not only traditional treatment of dental disease but also prevention and early detection. Comprehensive dental care takes into consideration of all the points of maintaining good oral health and minimizing the risk factors that can cause problems to it. It includes the restoration, repair of teeth and most of the oral cavity that has already been damaged due to aging or some accidental injury.

Since comprehensive dentistry deals with the protection of the oral cavity, it is protecting the organs below it in the digestive system from the effects of bacterial infection. Comprehensive dentistry thus deals with maintenance of all the tissues and bones of the mouth, which includes gums, teeth, jawbone, and tongue.

As part of patient's comprehensive examination, the dental specialist visualises examine the soft tissues of the oral cavity and surrounding muscles for changes and abnormalities.

Website: www.theoxford.edu

For Comprehensive Dentistry at The Oxford Dental College, an important piece of commitment to comprehensive care is that each patient is treated as a unique, whole person. The dental specialist looks at the mouth being connected to, influenced by and influencing the whole body. Factors such as general health, medications, state of nutrition, problems with stress from work or life, as well as patient's own self-care habits are all important in understanding what is happening with oral health. The treatment is being carried out in the Comprehensive dental unit in the department of Public Health Dentistry.

The list of procedures can be regarded as a comprehensive list of services offered by dentists in the Comprehensive dental unit in The Oxford Dental College.

Proposed sequences of dental services in a comprehensive dental care program are:

- a. Preliminary services
- b. Treatment services

Preliminary services: It includes

Emergency treatment like elimination of pain and infection (palliative Treatment). Oral prophylaxis

Dental health education about oral hygiene, nutrition Tobacco Cessation Counselling

Maintenance care

Preventive measures

Atraumatic Restorative Treatment

Fluoride application

Preventive Resin Restoration

Case finding (periodic check-up)

Treatment services: It includes

Diagnosis and treatment planning

➤ Radiographs

Restorative services

Restoration of all types

Root Canal Treatment

Corrective services-Periodontal therapy

Oral surgical procedures

3. GERIATRICS CLINIC

- The progress in healthcare is reflected with increase in life expectancy; hence there should a customized way to cater to needs of elderly patients
- Geriatric patients may have medical conditions thus requiring multiple medication and could also have compromised dexterity
- Hence the geriatric clinic aims at the following
 - To attend them on priority
 - To ensure shorter duration of appointments at patients convenience
 - To counsel patient for diet and nutrition
 - To train students to handle such cases with utmost patience and care
 - To provide with palliative care when necessary
 - To ensure patients are always assisted with use of lifts and wheelchairs in case of physical handicaps.
 - To establish communication with geriatrics patients.
 - To provide appropriate oral rehabilitation for geriatrics.
 - To help the patient to achieve satisfactory oral functioning.

Beneficiaries: post graduate students

DEPARTMENT OF ORAL AND MAXILLOFACIAL PATHOLOGY & ORAL MICROBIOLOGY

Specialty clinic-

A. SURGICAL REPORTING ROOM CUM RESEARCH ROOM

Objectives :

1. To be able to provide histopathological diagnosis of biopsies received from other departments in the college and referral cases.
2. To provide the high end Penta-head microscope with Jenoptik Germany ProgRes C5 cool CCD microphotograph camera projected on a 40" LED TV for training students in dental histology and diagnostic pathology .
3. To provide Microscope with attachments of polarising , fluorescent ,dark filed , phase contrast microscope and camera and stereomicroscope to identify normal and abnormal pathology and to conduct scientific research by both faculty and students.

Beneficiaries- Undergraduate and Postgraduate students ; Faculty

Mode and Schedule for Training

Lecture and Hands-on training:

-The training started with an introduction to microscope and lectures on different types of microscopes and their application in histology, diagnostic surgical pathology and research.

-For the hands-on session, the students were divided into groups and slides of different oral lesions were focused and explained.

6. ESTHETIC CLINIC

Training in Esthetic Restoration

TITLE: ESTHETICS- THE ART OF ILLUSION

OBJECTIVE: With the ever-growing consciousness among the general population about various cosmetic enhancement procedures, dental esthetic restorative procedures has gained paramount importance over the recent years.

INDICATION FOR ESTHETIC PROCEDURES

- 1.Caries
- 2.Occlusal disharmony of teeth
- 3.Loss of tooth substrate
- 4.Discolouration
- 5.Minor abnormalities
- 6.Missing teeth

METHODS: Esthetic procedures are technique sensitive and mainly depend on the extent of damage to be built up as well as the operator's skill. The following steps are followed:

Tooth Preparation

Cleaning of the tooth

Etching of tooth

Applying opaquer

Buildup of the cervical layer

Buildup of the Body Layer

Application of Tints

Buildup of the Incisal enamel

Placement of Proximal enamel

Students were taught about esthetic restoration in a lecture, followed by demonstration of the steps involved on typodont teeth. After the demonstration students were made to perform composite restoration and then use the composite polishing kit. Following this they were allowed to perform the same on patients. Post completion of treatment, it was evaluated by respected staff members.

THE OXFORD DENTAL COLLEGE

(Recognized by the Govt. of Karnataka, Affiliated to Rajiv Gandhi University of Health Sciences, Karnataka & Recognised by Dental Council of India, New Delhi)

Bommanahalli, Hosur Road, Bangalore – 560 068.

Ph: 080-61754680 Fax : 080 – 61754693E-mail:deandirectortodc@gmail.com

Website: www.theoxford.edu

Number of hours attended: 2 hours.

Faculty in charge: Dr Vijay R And Dr Jaykumar

CONCLUSION

Esthetic practices do not merely contribute to the overall beautification of an individual's profile but also helps to build up any tooth structure lost to caries, fracture etc. Esthetics in dentistry requires the artistic skill of balancing illusion with the pre-existing dental hard tissue and also complement the adjacent soft tissues. The nature of the restoration hence is widely influenced by the enamel, dentin and color of gingiva.
