**Summary:**

Teaching curriculum for dentistry comprises of four years of duration. The pre-clinical training program commences in the second year of dentistry for the undergraduate students. The main purpose of pre-clinical training is to make the students trained to various techniques and practices. The main purpose of pre-clinical training is for the potential benefit of the student. The students start the training process on the plaster models where they understand how to use the basic hand instruments and then on Typhodont. Students are trained right from the beginning to use all the dental instruments so that they get a good hand of it by the time they reach the clinics.

The pre-clinical endodontic lab is very well equipped with phantom heads where the students can get a simulation that they are working on real patients. The entire pre-clinical program is assessed by the teachers who guide and train the students so that they are ready to enter the clinical setup.

The post graduate pre-clinical training program is conducted in the first six months of their MDS course. The students are guided and trained extensively in the

department of Orthodontics, pedodontics, prosthodontics, conservative and endodontics. The students are trained on various aspects of using materials, wire bending, casting, root canals etc. The students are made to practice on both typhodont and natural teeth. The teachers guide them throughout the training program and which is overall supervised by the respective Head of the departments. The main objective is to provide an environment in which the students can practice the highest level of skills before entering the clinical setup.

The Department of Conservative Dentistry and Endodontics utilizes a newer method to carry out root canal procedures with high precision which will not be possible with conventional endodontic treatment.

The Department of Oral Pathology utilizes the tooth models for the benefit of the students to learn carving with great precision with the help of tooth models.

### **Tooth models to learn carving of the tooth anatomical details**

The department also has ceramic lab consisting of casting equipments including ceramic unit on which students will be working at pre-clinical and clinical level.

The dental curriculum is designed to educate students to achieve a highest level of clinical competence in order to provide high quality dental treatment.

In prosthodontic training clinical simulation exercises are of great importance for understanding the art and science. Pre-clinical training program should not only focus on hand work simulation expertise but also to do necessary adjustment according to real time clinical situation. Simulator plays an important role in successful completion of treatment strategies. The training program should be presenting with use of instruments, knowledge, scientific rationale, manual dexterity and dental material knowledge.

1. Pre-clinical lab: Demonstration of arrangement of artificial teeth on mean value articulator for undergraduate students and semi-adjustable articulator for PG students mounted in class I, class II and class III situations along with waxing, carving and polishing to be accomplished.

In phantom head lab: preparation of models of various tooth preparations to receive crown and bridges for fixed partial dentures are demonstrated.

Preparation of wax patterns for minimum of 3 unit fixed partial dentures and investing, casting and porcelain facing for batches of students are demonstrated the porcelain laminates and smile design are also included in clinical simulator exercise.

The Department of Prosthodontics utilizes semi- adjustable and fully adjustable articulators to orient the maxilla to cranium and subsequently the mandible to maxilla. The other departments which make use of these articulators are Department of Orthodontics and Oral Surgery for the orthognathic surgery cases.

**Title:** Visit to slum

**Objective:** To understand the sanitation, waste disposal, hygiene practices and availability of emergency health services for slum residents, thereby providing health education for improving their overall health conditions.

**Date:** 16/8/2021

**Time:** 3:30-4:30pm.

**Location:** Hongasandra, Bengaluru, Karnataka

**Organized by:** Department of Public Health Dentistry

**Participants:** Undergraduate students

**Speaker:** Kemperaju, local resident.

**Method adopted:** Verbal orientation on facilities and problems being faced by slum residents.

### **Description:**

We visited NGR slum near Roopena Agrahara, Bangalore on 16/8/2021 at 3:30 pm. Slum is inhabited by about 4000 people, out of which 1600 are children and rest adults. There are a total of 400 houses in that slum. Some of them are permanent houses that are structured, mud houses covered with thin cement sheets, straw and plastics sheets. Residents said Kauveri river water is supplied through pipelines at lane end and there is no scarcity of water. The slum is equipped with a Anganwadi Centre and inhabitants of that area visit Primary Health Centre in case of health issues. There are no government schools for girls in that area which forces the residents to send their children to nearby private and public schools. The residents of this slum were not aware of the government programs being carried out for the up liftment of the slums. Literacy rate of this community was average because of which they remain unaware of any of the government programs.

## THE OXFORD DENTAL COLLEGE

(Recognized by the Govt. of Karnataka, Affiliated to Rajiv Gandhi University of Health Sciences,  
Karnataka & Recognised by Dental Council of India, New Delhi)

Bommanahalli, Hosur Road, Bangalore – 560 068.

Ph: 080-61754680 Fax : 080 – 61754693E-mail:deandirectortodc@gmail.com

Website: www.theoxford.edu

Description: We visited Urban Primary Health Centre, Singasandra Bengaluru on 24<sup>th</sup> of August 2021 at 11:30AM. The brief introduction was given by Mrs. Sumithra who explained everything about the health centre. The objectives of the PHC were:

- i. To provide comprehensive primary health care to the community through the Primary Health Centres.
- ii. To achieve and maintain an acceptable standard of quality of care.
- iii. To make the services more responsive and sensitive to the needs of the community.

### Functions of the Primary Health Centre (PHC)

#### 1. OPD Services

A total of 6 hours of OPD services out of which 4 hours in the morning and 2 hours in the afternoon for six days in a week. Minimum OPD attendance is expected to be 40 patients per doctor per day.

#### 2. Emergency Service 24 hours

Appropriate management of injuries and accident, First Aid, stitching of wounds, incision and drainage of abscess, stabilisation of the condition of the patient before referral, Dog bite/snake bite/scorpion bite cases, and other emergency conditions. These services will be provided primarily by the nursing staff.

#### 3. In patient services:

It consisted of a male as well as a female ward with 3-3 beds each.

#### 4. Maternity and Child Health Care including family planning

- ANTENATAL CARE

1. Early registration of all pregnancies ideally in the first trimester (before 12th week of pregnancy). However, even if a woman comes late in her pregnancy for registration she should be registered and care given to her according to gestational age.
2. Nutrition and health counselling . Brief advice on tobacco cessation if the antenatal mother is a smoker or tobacco user and also inform about dangers of second hand smoke.

- INTRNATAL CARE

1. Promotion of institutional deliveries.
2. Management of normal deliveries.
3. Assisted vaginal deliveries including forceps/vacuum delivery whenever required.
4. Pre-referral management (Obstetric first-aid) in Obstetric emergencies that need expert assistance (Training of staff for emergency management to be ensured).

CHILDREN'S EDUCATION SOCIETY (Regd.)

Website: www.theoxford.edu

5. Minimum 48 hours of stay after delivery.

• **POSTNATAL CARE**

1. Post- natal care for 0 & 3rd day at the health facility both for the mother and new-born and sending direction to the ANM of the concerned area for ensuring 7th & 42nd day post-natal home visits. 3 additional visits for a low birth weight baby (less than 2500 gm) on 14th day, 21st day and on 28th day.
2. Initiation of early breast-feeding within one hour of birth.
3. Counselling on nutrition, hygiene, contraception, essential new born care (As per Guidelines of GOI on Essential new-born care) and immunization.

• **NEW BORN CARE**

Facilities for Essential New Born Care (ENBC) and Resuscitation (Newborn Care Corner in Labour Room/OT)

• **CARE OF CHILD**

1. Routine and Emergency care of sick children including Integrated Management of Neonatal and Childhood Illnesses (IMNCI) strategy and inpatient care. Prompt referral of sick children requiring specialist care.
2. Full Immunization of all infants and children against vaccine preventable diseases as per guidelines of GOI.
3. Vitamin A prophylaxis to the children as per national guidelines.
4. Prevention and control of routine childhood diseases, infections like diarrhoea, pneumonia etc. and anemia etc.
5. Management of severe acute malnutrition cases and referral of serious cases after initiation of treatment as per facility based guidelines.

• **FAMILY WELFARE**

1. Education, Motivation and Counseling to adopt appropriate Family planning methods.
2. Provision of contraceptives such as condoms, oral pills, emergency contraceptives, IUCD insertions.
3. Referral and Follow up services to the eligible couples adopting permanent methods (Tubectomy/Vasectomy).
4. Counselling and appropriate referral for couples having infertility.

5. Management of Reproductive Tract Infections/Sexually Transmitted Infections

1. Health education for prevention of RTI/STIs.
2. Treatment of RTI/STIs.

6. NUTRITION SERVICES

1. Diagnosis of and nutrition advice to malnourished children, pregnant women and others.
2. Diagnosis and management of anaemia and vitamin A deficiency.
3. Coordination with ICDS

7. Health service provision Screening, health care and referral:

- 1) Screening, health care and referral:

CHILDREN'S EDUCATION SOCIETY (Regd.)

Website: www.theoxford.edu

- a) Screening of general health, assessment of Anaemia/Nutritional status, visual acuity, hearing problems, dental check up, common skin conditions, Heart defects, physical disabilities, learning disorders, behavior problems, etc.
  - b) Basic medicines to take care of common ailments, prevalent among young schoolgoing children.
  - c) Referral Cards for priority services at District/Sub-District hospitals.
- 2) Immunization:
- a) As per national schedule
  - b) Fixed day activity
  - c) Coupled with education about the issue

### 8. ORAL HEALTH

Oral health promotion and check ups & appropriate referral on identification.

### 9. BASIC LABORATORY AND DIAGNOSTIC SERVICES

Essential Laboratory services including

1. Routine urine, stool and blood tests (Hb%, platelets count, total RBC, WBC, bleeding and clotting time).
2. Diagnosis of RTI/STDs with wet mounting, Grams stain, etc.
3. Sputum testing for mycobacterium (as per guidelines of RNTCP).
4. Blood smear examination malarial.
5. Blood for grouping and Rh typing.
6. RDK for Pf malaria in endemic districts.
7. Rapid tests for pregnancy.
8. RPR test for Syphilis/YAWS surveillance (endemic districts).
9. Blood Sugar.
10. Blood Cholesterol.
11. ECG.

**CONCLUSION:** As a future Public Health Dentist it is important to know that “Health care is a basic human right” which is provided by such PHCs. Primary Health Centre is an essential health care based on practical, scientifically sound and socially acceptable methods and technology made universally accessible to individuals and family in the community through their full participation and at a cost that community and the country can afford to maintain at every stage of their development in the spirit of self-reliance and self determination.

**Speaker:** Dr .Vinod Kumar A R

**Method adapted:**A visual method was adapted by our eminent speaker Dr. Vinod Kumar, a maxillofacial radiologist by profession and a specialist in CBCT interpretation and reporting.

- **Description:**The entire session was divided into two halves. During the first session a brief description was given about the different 2D-3D imaging models – comprising of CBCT, Lateral Cephs, OPG'S manufactured by" Kodak Carestream" CS 9300 with optional Kvof 60-90 Kv/60 -120 Kv.
- The second session was based on live demonstration of latest CBCT software being used currently in generation of various planes enabling multi-dimensional assessment, accurate diagnosis, improved treatment planning and more efficient patient care.
- Lastly a questionnaire session was conducted, in which the post graduates could raise their respective queries regarding the same.

**THE OXFORD DENTAL COLLEGE**

**Activity Report**

**Title:** Visit to Oxford Medical College

**Objective of the visit:** The objective of the field visit is to give the students brief insight into the various tests and techniques used in microbiology laboratory.

**Date:** 17/05/2022

**Time:** 9.30 am

**Venue:** The Oxford Medical College and Hospital & Research Centre, Attibele.

**Organisers:** Department of Microbiology, The Oxford Medical College and Hospital

**Participants:** First year post graduate students

**Staff in charge:** Dr. Ashwija

**Method adopted:** Verbal orientation and demonstration

**Description:** The Field visit to The Oxford Medical College and Hospital & Research Centre was scheduled on 17/05/2022. The PG students from The Oxford Dental college boarded the bus arranged by the college at 8:30 am and reached The Oxford Medical College and Hospital & Research Centre at 9:30 am. The field visit began by visiting the laboratories of Microbiology department located in the premises of the Hospital campus, where the students were welcomed by the Head of the Department of Microbiology Dr. Rajini. M.

The students were given brief insight into sample collection, processing of samples, different types of tests performed to orientation on RT-PCR technique, blood sample collection.

In Microbiology lab- (i) Bacteriology- culture method, identification tests (Biochemical reactions) and sensitivity plates were explained and shown.

(ii) Serology- various ICT (immunochromatographic tests) like HIV, HB,AG, HCV, MALARIA, DENGUE.

(iii) Mycology- fungal cultures were shown and explained about the culture morphology and pigment produced. Fluorescent stained fungal elements from skin scrapping were shown.

(iv) RT-PCR lab- Unidirectional flow of sample was explained. Donning and doffing area were shown, steps of extraction of RNA, template addition, addition of positive control were explained. Amplification room was shown and ThermoFisher Quant studio 5 RT-PCR machine demo was given.

## THE OXFORD DENTAL COLLEGE

### Activity Report

**Title:** Visit to CBCT center

**Objective:** To enlighten the postgraduate students about the diagnostic importance of CBCT in the field of Endodontics.

**Date:** 14.06.2022

**Time:** 1:00 pm – 3:00 pm

**Location:** KANVA DIAGNOSTICS, Nagarbhavi, Bengaluru.

**Organized by:** Department of Conservative Dentistry and Endodontics.

**Participants:** II YEAR MDS students.

**Speaker:** Dr. Vinitra Vasan, Consultant Oral and Maxillofacial Radiologist.

**Method adopted:** Verbal orientation on CBCT and demonstration.

**Description:** We visited KANVA DIAGNOSTICS, one of the biggest diagnostic center in Bengaluru on 14.06.2022 at 01:00 PM. The brief CBCT orientation was done by Dr. Vinitra, who explained about its potential applications in endodontics as well as in other fields of dentistry. She had also highlighted the advantages of CBCT over conventional radiography. She explained about the CBCT hardware which consists of an x-ray source and detector, or sensor, mounted on a rotating gantry. She described about reconstruction of the CBCT images which can be displayed in a variety of ways. The images of the area of interest can be visualized in three orthogonal planes i.e., axial, sagittal and coronal, simultaneously, affording the clinician a truly three-dimensional view of the area of interest.

**DEPARTMENT OF PERIODONTICS**

**ACTIVITY REPORT**

**Title:** Visit to The Department of Microbiology, The Oxford Medical College, Bangalore

**Objective:** to learn the applications of Enzyme Linked Immune Sorbent Assay (ELISA) in Periodontics.

**Date:** 12/08/2021

**Time:** 10:00 am to 2:00pm.

**Location:** The Department of Microbiology, The Oxford Medical College, Bangalore

**Organised by:** Department of Periodontics, Bangalore.

**Participants:** 1 staff in-charge (Dr Srinivasu) and 08 Post-graduate students.

**Speaker:** Dr Rajni, The Department of Microbiology, The Oxford Medical College, Bangalore

**Method adopted:** Verbal orientation on equipment and visit to the Biochemistry & Microbiology lab, followed by a talk by Dr Rajni.

**Description:**

In this field visit, a guided tour to the labs of Biochemistry & Microbiology was done, to show the students the processes of performing the assay (ELISA). After the visit, a presentation and talk was conducted by Dr Rajni, on various applications of ELISA, choosing an appropriate kit, ideal conditions to store it and common mistakes to be avoided before and during the procedure.

This will provide students an understanding on the applications and limitations of ELISA and allow them to choose appropriate methods in periodontal research.

**DEPARTMENT OF PERIODONTICS**

**ACTIVITY REPORT**

**Title:** Visit to The Department of Microbiology, The Oxford Medical College, Bangalore

**Objective:** to learn the importance of HbA1c test, and its correlation to periodontal pathogens part 1

**Date:** 19/02/2022

**Time:** 10:00 am to 2:00pm.

**Location:** The Department of Microbiology, The Oxford Medical College, Bangalore

**Organised by:** Department of Periodontics, Bangalore.

**Participants:** 1 staff in-charge (Dr Ashish ~~Nichani~~) and 08 Post-graduate students.

**Speaker:** Dr Rajni, The Department of Microbiology, The Oxford Medical College, Bangalore

**Method adopted:** Verbal orientation on equipment and visit to the Biochemistry & Microbiology lab, followed by a talk by Dr Rajni.

**Description:**

In this field visit, a guided tour to the labs of Biochemistry & Microbiology was done, to show the students the different processes of obtaining values of HbA1C levels in blood. After the visit, a presentation and talk was conducted by Dr Rajni, on the importance of HbA1C levels in general, and its influence on the periodontopathic microorganisms in particular. The bidirectional relationship between Diabetes Mellitus & Periodontal disease was also stressed upon.

FIELD VISIT  
2021 – 2022

**Title:** Visit to Laxmi Dental Laboratory, Bangalore

**Date:** 18/4/2022

**Time:** 08:00 am – 06:00 pm

**Venue:** Laxmi Dental Laboratory, Bangalore

**Organized by:** Department of Prosthodontics, The Oxford Dental College.

**Objective of the visit:** To visit and learn the laboratory skills

**Staff in charge:** Dr. Malathi Dayalan

**Speaker:** Mr. Javare Gowda

**No. of Participants:** 07

**Method adopted:** Lectures and seminars, demonstrations, hands-on

**Brief Report:** The students of second year MDS, Batch 2021 -2022 had attended a field visit on Laxmi Dental Laboratory, held at 18/4/2022, Bangalore. The team was very informative and explained each and every step involved in the fabrication of the prosthesis. Different techniques were explained such as 3-D printing or additive manufacturing which is a process of making three dimensional solid objects from a digital file. The technology used is the photopolymerisation, a technique that involves the solidification of photo-sensitive resin by means of a UV light. It is used by different 3D printing processes such as: Stereolithography (SLA) which uses a vat of curable photopolymer resin. Another technique used in the lab is the Subtractive manufacturing (or CNC) which is the process of starting with more material that is needed in sheet, rod or block form, and selectively removing material that is not required until the final shape emerges. A milling machine cutting/hollowing out a piece of metal or plastic is an example of subtractive manufacturing. This field visit was very helpful for upgrading clinical scenario for future practice.

THE OXFORD DENTAL COLLEGE

Activity Report

**Title:** Visit to Skanda Life Sciences .

**Objective of the visit:** To have a brief insight in to research services for educational purposes

**Date:**14/2/2022

**Time:** 1pm – 3.30 pm

**Venue:**Skanda Life Sciences

**Organized by:** Department of Orthodontics and dentofacial orthopedics

**Participants:** 4postgraduates

**Speaker:**

**Staff Incharge:** Dr Anju Varughese

**Brief Report:** On 14<sup>th</sup> February 2022, postgraduate students of orthodontics visited the Skanda Life Sciences. This is a Bangalore based biopharmaceutical R&D centre which offers an integrated research services in various fields of healthcare and biotech industries . We were offered an insight into the laboratory which is well equipped to perform various investigations with respect to both in-vivo and invitro studies. Questions were encouraged about the various aspects of research and development in the field of healthcare services. It was a wholesome experience.

### Department of Pedodontics

#### THE OXFORD DENTAL COLLEGE

##### ACTIVITY

Title: Visit to the Metallurgical laboratory

Objective: To create awareness for the students about the importance of equipments in the laboratory in dentistry.

Date: 20-10-2021

Time: 9am to 4pm.

Location: Electronic city, Phase 1, Bangalore.

Organised by: Department of Pediatric and Preventive dentistry.

Participants:

Speaker:

Method adopted: Verbal orientation on various instruments used in the metallurgical laboratory and their function.

Description: We visited ARML laboratory on 20-10-2021 at 10:30 am. The laboratory was well equipped. The lab technician thoroughly described about various equipments Optical Emission Spectrometry, equipments to measure Vicker, Knoop and Brinell hardness, and to test flexural strength of various materials and their functioning.

As a dentist we should know the physical properties of various dental materials for its use in clinical practice. Thus laboratory had equipments which were used to measure hardness, strength and various physical properties. Thus the lab technician gave a thorough knowledge about the equipments and demonstrated its use.

**Objective:** To gain knowledge about the Manufacturing unit of the Dental chairs

**Date:** 12-11-2021

**Time:** 10.00 am to 03.00pm

**Location:** Bidadi Industrial area, Bangalore

**Organized by:** Department of Public Health Dentistry

**Audience:** Undergraduate students

**Speaker:** Mr. Subhash Chandra shetty

**Method adopted:** Lecture

**Materials used:** live demonstrations, lectures

**Description:**

Field visit team comprised of Fourty Undergraduate students from the Department of Public Health Dentistry. On 12 th Nov 2021 our project team gathered in the Department of Public Health Dentistry at 8 am and we left the college by 8.30 am in a cab. We reached our destination at 10.30 am. Then briefing was done regarding the establishing of the confident Dental chair Equipment industry. Following this, step-by-step we did a detailed understanding of the whole industry unit from the components to assembling of the whole unit. The manufacturing unit is located near bidadi around 40 kms from The Oxford Dental college, Bommanahalli, Bangalore. As students this visit helped us understand how a chair is assembled and manufactured and its important that we do understand the basic maintainence of the dental chairs which will help us a long way in my career.

		RICH FIBRIN FOR BONE AUGMENTATION IN ATROPHIC ALVEOLAR RIDGES FOR IMPLANT PLACEMENT.
7.	DR. YUKTHI B K	COMPARATIVE EVALUATION OF CHANGES IN MARGINAL BONE LEVEL FOLLOWING IMPLANTS PLACED WITH FLAPLESS VERSUS FLAP METHOD - A CLINICAL STUDY.
8.	DR TULIMA BEGUM	COMPARATIVE EVALUATION OF EFFICACY OF TWIN FORK SHAPED MINIPLATE VERSUS 3-DIMENSIONAL MINIPLATE FOR FRACTURE FIXATION IN THE PARASYMPHYSIS-BODY REGION USING FINITE ELEMENT ANALYSIS - AN VITRO STUDY
<b>Department of Conservative</b>		
1.	DR ANJALI	EVALUATION OF ANTIBACTERIAL EFFICACY OF THREE NANOPARTICLE BASED ROOT CANAL IRRIGANTS AGAINST ENTEROCOCCUS FAECALIS USING REAL TIME POLYMERASE CHAIN REACTION- AN IN VITRO STUDY
2.	DR HEMALATHA	AN IN VITRO RADIOLOGICAL EVALUATION OF IRRIGANT PENETRATION IN THE ROOT CANALS USING THREE DIFFERENT IRRIGATION SYSTEMS: AQUAPICK DEVICE, PASSIVE IRRIGATION, MANUAL DYNAMIC IRRIGATION SYSTEMS
3.	DR AYUSHI	EFFECT OF PERICERVICAL DENTINE THICKNESS ON FRACTURE RESISTANCE OF ENDODONTICALLY TREATED TEETH RESTORED WITH GLASS IONOMER CEMENT AND COMPOSITE- AN IN VITRO STUDY
4.	DR POOJA	INFLUENCE OF DIFFERENT INSTRUMENTATION TECHNIQUES AND CANAL CURVATURE ON CANAL CENTERING ABILITY AND SMEAR LAYER FORMATION- AN IN VITRO STUDY
5.	DR SUPRITHA	COMPARATIVE EVALUATION OF TWO DIFFERENT ROTARY FILE SYSTEMS IN THE INDUCTION OF DENTINAL MICROCRACKS USING SCANNING ELECTRON MICROSCOPY- AN IN VITRO STUDY
6.	DR NISHITHA	EVALUATION USING FINITE ELEMENT ANALYSIS OF THREE ROOT CANAL PREPARATION TAPERS ON STRESSES WITHIN THE ROOTS
7.	DR JISNA	COMPARISON OF APICAL MICROLEAKAGE IN ROOT CANALS WITH SEPARATED ROTARY INSTRUMENTS OBTURATED WITH DIFFERENT ENDODONTICS SEALERS:
