Report

Title: Regenerative Dentistry and Oral Pathology

Date: 21-11-2016

Speaker: Prof. Dr. S Sankaranarayanan

Time: 9.00- 5.30pm

Location: The Oxford Dental College, Bangalore

Organized by: Department of Oral Pathology and Microbiology

Audience: PGs, Interns and Faculty

Speaker: Prof. Dr. S Sankaranarayanan

Method adopted: Lecture, hands on experience and live demonstration

Materials used: Power point presentation, pamphlets, flyers, banner, back drop, and videos

Objectives:

- ❖ To create awareness among the Participants about Regenerative Dentistry, stem cells and their application in Dentistry
- ❖ Dental Pulp derived Stem cells and their clinical application in Oral Pathologies

Description:

The Department of Oral Pathology, Oxford Dental College conducted a CDE Programme on "Regenerative Dentistry and Oral Pathology" on 21st November 2016. A total of 60 PG students and Faculty from Oxford Dental College participated in the CDE Programme.

Stem cell research has potential to treat many different diseases but most stem cell research is still at the laboratory/experimental stage or in form of early clinical trials. Only hematopoietic stem cell therapy is a proven treatment. Dr. Shankar Narayanan highlighted on Stem cells derived from pulp and their application in treatment of several Oral lesions like OSF, Osteoradionecrosis of Mandible, and on Regeneration of Mandible post treatment of Ameloblastoma and other Odontogenic lesions. He also spoke on stem cell therapy in Periodontal Regeneration and conducted a workshop on same.

Oral Hygiene Day Celebration

Oral hygiene day is celebrated on 1st August, every year, in memory of the birth anniversary Dr. G B Shankwalkar the doyen of Indian Periodontics. This year, the Department of Periodontics in collaboration with the Department of Public Health Dentistry coordinated to organize a rally from Silk Board Flyover to The Oxford Dental College.

The rally was started flagged off by Dr Anirban Chatterjee, Professor and Head, Department of Periodontics, The Oxford Dental College, Bangalore at 9:30 am. Over 300 post-graduates and interns took part in this rally. During the 3 kilometer walk from banners were carried by all participants in the rally to educate the general public about the importance of oral health. In addition, pamphlets were distributed to passers-by to further inculcate the importance of oral hygiene.

ARDS Implants-Minimum Drilling and Maximum Stability

The Department of Periodontology at The Oxford Dental College and Hospital in association with ARDS Implants (Israel) held an implant training program for post-graduate students in the departments of Periodontology on 8th of April 2017.

The basics of implant materials, biology of peri-implant tissues and surgical aspects of dental implants were taught by Dr Uri Arny (President, Medical safety manager, Developer of ARDS implant drilling technique). Dr Arny is a graduate of Tel Aviv university (1980) with over 20 years of experience in the field of dental implantology. The training program commenced at 9 am on 8th April 2017 with a lecture on 'Introduction, history and anatomical considerations of dental implants' followed by lectures on basics of 'Osseointegration and wound healing, Surgical principles and suturing, Bone density classification and implications, 'Drilling protocol' and on 'Complications in implant dentistry'. In the post lunch session, there was a hands-on training of implant placement in sheep jaws.

The students were then evaluated with an MCQ based question paper and feedback was also obtained for the course. The program was wound up following a valedictory function where certificates were distributed to the course participants.

Medico-Legal Aspects in Dentistry

Title: Medico-Legal Aspects in Dentistry

Date: 13-01-2018

Location: Auditorium, The Oxford Dental College.

Organized by: TODC, Bangalore.

Beneficiaries/Audience: Students and teaching staff.

Speaker: Dr. Prahlad,

Method adopted: Lecture, Offline.

Description: The programme started at 10am in the seminar hall with an introduction by the head of the department Dr. Sirekha. Lecture explained the importance of medico legal aspects in dentistry with discussion of clinical cases. The post-graduation students were successfully able to understand about negligence in dentistry and its impacts with the knowledge acquired from the course. The post graduate students were given the certificate of participation for an effective participation and understanding of the topic.

Report

Title: Novel Developments in Salivary gland Pathology

Objectives:

- To explain the participants about various auxiliary techniques in Diagnosis of Salivary gland tumors
- To discuss the changes in latest WHO Classification of Salivary gland tumors and their Histomorphology

Description:

The Department of Oral Pathology, Oxford Dental College conducted a CDE Programme on "Novel Developments in Salivary gland Pathology" on 16th February 2018. A total of 50 PG students and Faculty from Oxford Dental College participated in the CDE Programme

Diagnosis of Salivary gland tumors can be challenging because of the many diagnostic entities and overlapping morphological features, and the rarity of these tumors. For a salivary gland tumor, a needle biopsy is the preferred test for making a diagnosis. A surgical biopsy is avoided in almost every case, except in rare exceptions. Clinical examination and Imaging tests may be used for a provisional diagnosis, however definitive diagnosis is challenging. Several Auxiliary techniques have been developed to overcome these challenges like different IHC markers and fluorescence in situ hybridization probes. These ancillary testing approaches are useful in small biopsy samples. Molecular techniques have also added to our understanding of salivary gland tumor pathology and help us to recognize potential targets for treatment of these tumors. Appropriate molecular testing into the pathological evaluation of salivary gland tumors will help develop new targeted therapy treatments.

During the course, lectures were conducted on the recent WHO Classification, Imaging techniques and other molecular techniques in Salivary gland tumors. This was followed by the Valedictory function. The Organizing committee by Department of Oral Pathology and students who participated were appreciated for all the efforts put to make the event a great success.

OUTCOME ANALYSIS – At the end of the CDE, the participants were shown several cases of salivary gland tumors from the archives and all diagnostic techniques were discussed with active involvement of the participants to improve their Clinical Practice

Rally:

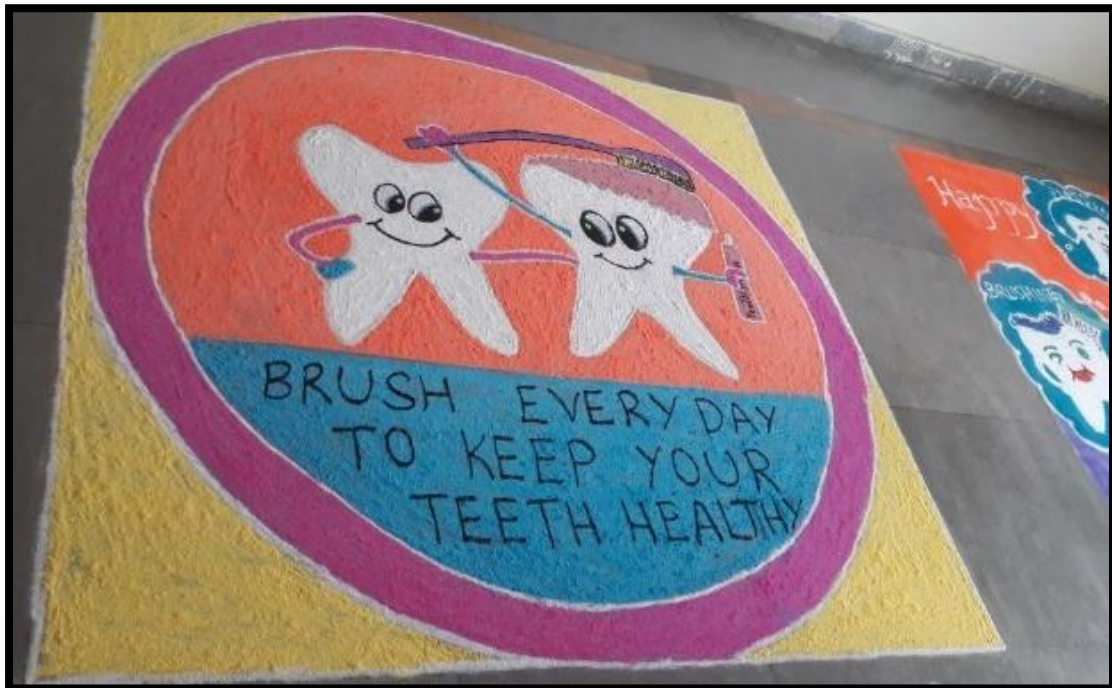

The celebrations of the oral hygiene week, culminated in a rally held on Tuesday, the 1st of August 2017. The rally started from college, covered a distance of 3 kilometers, before finally ending at the college gate. The rally traversed through the adjoining campus of AMR tech park and Crocus hotel buildings. Along the way, a street play and a flash mob were held. There were over 300 participants in the rally, comprising of staff, undergraduates, interns and postgraduates from all departments.

The celebrations of Oral Hygiene day were capped off with lectures on oral hygiene by Dr Anirban Chatterjee and Dr Savitha AN.

Oral B Oration:

The Oral B oration on 'Oral Hygiene Day' was held on the 1st of August 2017 in the auditorium of The Oxford Dental College and Hospital, Bangalore. The program comprised a 2-part series of lectures delivered by Dr Anirban Chatterjee and Dr Savitha AN. The first lecture was given by Dr Anirban Chatterjee on "Periodontics beyond oral prophylaxis" which began at 9 am on the 1st of August. The second lecture was delivered by Dr Savitha AN on "Toothbrushing and the evolution of oral hygiene procedures". Both lectures were highly appreciated by the audience of about 200 delegates comprising of undergraduates, postgraduates, interns and staff. This was followed by distribution of prizes and the oral hygiene day rally.

Report

Title: E-Mail Writing

Date: 06-01-2018

Time: 9:30 am to 2:00 pm.

Location: Auditorium, The Oxford Dental College

Number of the Audience: 33

Speaker: Jesse Koshy

Description: A one-day program was organised on “E-mail writing” at the Oxford Dental College on 6th January 2018. The speaker, Jesse Koshy, faculty of Oxford Engineering College, spoke on how to write a professional e-mail. What are the basic structures or components of email and the common mistakes to avoid? Many questions were asked by the attendees on how to write an email on sensitive topic and how English grammar plays a role. All the questions were answered well by the speaker.

REPORT - "Magnification".

The Department conducted a certificate course for post-graduate students & interns by **Dr. Vinod Kumar**, on "Magnification". The program was held on **28/10/2018** with lecture followed by demonstration & hands on.

Magnification devices in endodontics is mainly meant for visual enhancement and improved ergonomics. This is crucial especially when long hours are spent in a narrow operating space to treat obscure microanatomy.

In endodontics magnification has its role in diagnosis, non-surgical and surgical endodontics. Clinician documentation can be well maintained.

The combination of improved lighting and magnification has been improved presently by orascope, Dental Operating Microscope, Surgical telescopes or loupes. However its acceptance and application is taking time.

By the end of the programe participants has gained knowledge on magnification devices such as loupes and Microscope and its importance in the

Report

Titles: Clinico-Pathologic Correlation of Odontogenic lesions

Objectives:

- To know the clinical appearance and histopathology of various commonly occurring odontogenic lesions
- To equate the morphological features of the lesions with to the probable histopathologic features.

Materials used: Power point presentation, pamphlets, flyers, banner, back drop, and videos

Description: The CDE Programmed was held on 14/03/19 and the topic for the programmed was "Clinico-Pathologic Correlation of Odontogenic lesions". The objective of conducting the programmed was to gain insights to know and correlate the clinical appearance and histopathology of various commonly occurring odontogenic lesions. The Speaker was Dr Bharati P, Professor from Department of Oral Medicine, The Oxford Dental College, Bangalore.

The programmed was inaugurated by the Dean and attended by the teaching faculty who learnt the clinical and histomorphology similarities of these lesions. The clinical appearance, radiographic features and their importance in histopathological diagnosis was emphasized. The speaker used power point presentation for the programmed. The talk was well received by the staff members who asked queries at the end of the session regarding the application.

Few case reports from the presenters achieves was presented to the audience. The cases were discussed by correlating the clinical features and radiological features with the histopathological features. There was a positive response from the audience during interactive session of the program. The queries from the staff were effectively answered by the speaker. The programmed was followed by lunch and valedictory programmed.

Report

A one-day program was organized on "Sedation in Dentistry" at The Oxford Dental College on 18th July 2018. The speaker, Dr. Krishna Mohan, faculty of Oxford Dental College, spoke about management of difficult patients using sedation in everyday dental practice. Many questions were asked by the attendees about various methods and complications associated with sedation. All the questions were answered well by the speaker.

Internet-Hardware and Software

Title: Internet-Hardware and Software

Date: 27-10-2018

Location: Auditorium, The Oxford Dental College

Number of the Audience: 35

Speaker: Mr. Ekabaram

Description: A one-day program was organised on "Internet-Hardware and Software" at the Oxford Dental College on 27th October 2018. The speaker, Mr. Ekambaram, faculty of IT Cell, Oxford Engineering College, spoke Internet and the required hardware and software. The hardware is all the computers, cabling and infrastructure and software is the computer's operating system plus the software running the network equipment. Many questions were asked by the attendees on how to connect and reset internet settings in the computer. All the questions were answered well by the speaker.

'Integrate 2018, An Advanced Implant Program

Report

The Oxford Dental College and Hospital in association with the Indian Society of Periodontology and Bangalore Academy of Periodontology, had conducted an advanced implant program called "Integrate 2018" for two days, i.e. 26th and 27th July 2018.

A total of 279 delegates from Maharashtra, Tamil Nadu, Andhra Pradesh, Telangana, Chattisgarh, Orissa and Karnataka attended Integrate 2018. The delegates were exposed to a plethora of advances in implant integration. The scientific session of the 2-day program kicked off with a lecture by Dr.T.V. Narayanan on "Bone grafting techniques-where are we today." This was followed by lectures from other experienced implantologists including Dr Anuradha Navaneetham, Dr Jeevan Aiyappa, Dr Sandeep Singh, Dr Rakshith Hegde and Dr Deepa Jaishankar. Their lectures varied on a variety of topics ranging from "Graftless solutions in Implantology" to "Piezo-Surgeries and Growth Factors - Predictable and Precise Approach in Bone Regeneration" also touching into the Prosthetic aspects of oral implantology. The first day also had a live surgical demonstration of use of LPRF and sticky bone during implant placement in deficient ridges. The proceedings of the program on day 1 went well past 6 PM. The entire audience was left awestruck at the scientific sessions and surgical demonstration on Day1. During the course of the day, a parallel scientific session was held with the presentation of E-Posters by post-graduate students.

The proceedings of the scientific session on Day 2 were initiated with a lecture by Dr. Himanshu Ajwani on the "Application of nanotechnology for bone regeneration." This was followed by lectures by Dr Prafulla Thumathi, Dr Sandeep Singh, Dr Vinayak Gowda and Dr Burzin Khan on various topics including 'Digital analysis of implant occlusion' to "PET- Reality or Hyper-Reality" whilst also mentioning about "Aesthetic and Functional Predictability with Immediate & Immediate Loading Implants."

Website: www.theoxford.edu

This was followed by a live surgical demonstration by Dr Burzin Khan who demonstrated "Immediate loading implant placement in the esthetic zone." The audience gave a thundering applause to the surgical demonstration when completed. The live demonstrations by Dr. Sandeep Singh and Dr. Burzin Khan conducted helped the Post-graduate students to understand theoretical concepts of Implant better.

A theory assessment of the participants was conducted to evaluate the success of the program as well as grading the participants.

This was followed by the Valedictory function and prize distribution. The proceedings of the program were thus brought to an end by 5:30 pm on the 27th of July 2018.

Oral B Talk On 'Oral Hygiene Care'

Report

Oral hygiene day is celebrated on 1st August, every year, in memory of the birth anniversary Dr G B Shankwalkar the doyen of Indian Periodontics.

The Oral B oration on 'Oral Hygiene Day' was held on the 1st of August 2018 in the auditorium of The Oxford Dental College and Hospital, Bangalore. The program comprised of an Oral B lecture delivered by Dr. Gayatri. R. G, Professor, Department of Periodontics. The lecture was given by Dr. Gayatri.R. G on "Oral Hygiene Care" which began at 9:00 am on the 1st of August 2018. The lecture was highly appreciated by the audience of about 155 delegates comprising of undergraduates, postgraduates, interns and staff.

This was followed by a Listerine Series Lecture by Dr. Amita Coutinho. This lecture was sponsored by Listerine.

This was followed by a Certificates with Tokens of Appreciation to the Speakers. Oral B brushes, Listerine mouthwashes and Listerine bags and certificates from both sponsors were given to delegates followed by the collection of Feedback forms.

Laser Dentistry Preconference Workshop, Part of 3rd International Digital Dental Conference

Report

The Department of Periodontology at The Oxford Dental College and Hospital held a laser training program on 3RD August 2018. In all, a total of 150 students from all over Karnataka took part in the program. The basics of dental lasers were taught by Dr Vidya Hari Iyer (General practitioner, Course mentor and Guest speaker Biolase) and Dr. Mahendranadh Reddy (Prosthodontist, Implantologist, Laser specialist, Professor and Head, Sri Sai College of Dental Surgery, Vikarabad). The lectures also included 'Laser physics', 'laser tissue interactions, Laser Safety. There were also live streamed demonstrations of using Diode dental lasers in crown lengthening and periodontal surgical procedures. Participants were also given hands-on training on tomatoes and egg shells.

The Oxford Dental College Implant Training Course, Dentium Basic Course

Report

The Department of Periodontology at The Oxford Dental College and Hospital in association with Dentium implants (South Korea) held an implant training program for post-graduate students in the departments of Periodontology, Oral Surgery and Prosthodontics between November 2018 and August 2019. Besides the postgraduates from these departments, interns too took part in the training program. In all, a total of 23 students took part in the program.

The training program commenced on 15-11-2018 with the first module comprising of a two-day program introducing students to oral implantology. The basics of implant materials, biology of peri-implant tissues and surgical aspects of dental implants were taught by Dr Tarun Kumar (Periodontist and Implantologist, Bapuji Dental College and Hospital, Davanagere, Karnataka, Speaker Dentium Implants) in this module. This was followed by a hands-on training of the students on the second day of the module on 16-11-2018 regarding the nuances of flap reflection, drilling biomechanics and suturing. Following this, the students were instructed to search for patients requiring implants, which were to be placed in the second module.

The second module of the implantology course was held on the 7th and 8th of March 2019. The students had collected patients requiring dental implants over the three months between the first and second modules. The second module commenced with a lecture on surgical aspects of implant placement. This was followed by pre-surgical evaluation of the patients to be treated. Following this, a total of 45 dental implants were placed by 15 students in this module. The patients were then asked to wait for 3 months for the final loading of the implants.

The third module of the implantology course was held on 25th and 26th April 2019. As with the previous module, this module too started with a lecture on the surgical aspects of implant placement. The students who did not place implants in the previous module, placed implants in this module. In all, a total of 15 students placed 45 implants in this module. The second and third module (Surgical aspects of implant placement) were conducted by Dr. Tarun Kumar.

Website: www.theoxford.edu

The next module was held on 7th and 8th June 2019 by Dr Ramesh Choudary (Prosthodontist and Implantologist, Professor, Raja Rajeshwari Dental College, Bangalore, Speaker Dentium Implants). This module focused on loading of implants that were placed three months before this module. None of the patients reported any adverse events in the intervening three months between implant placement and implant loading. Forty-five implants that were placed in March 2019 were loaded in this module. All impressions were taken by the open tray technique and the impressions were transferred to casts and study models.

The final module of the implant course was held on 21st and 22nd August 2019. This was conducted by Dr. Tushar Chawla (Implantologist, Speaker, Dentium Implants). The remaining forty-five implants that were placed in April 2019 were loaded in this module.

All students who participated in this training program were given certificates and certified as implantologists by Dentium implants (South Korea). The implant training course was thus concluded with over 100 hours of theoretical, hands-on and clinical training. All patients have since been placed on regular recall and maintenance.

Oral B Talk On "Importance of Modern-Day Oral Hygiene Aids-Interdisciplinary Approach"

Report

World Oral Health Day 2019 Oral B Oration:

The Oral B oration on 'World Oral Health Day' was held on the 20th of March 2019 in the auditorium of The Oxford Dental College and Hospital, Bangalore.

The program was inaugurated by lighting of lamp and was presided over by our beloved Dean and Director, Dr. A.R Pradeep. Following this the Oral B oration lecture was delivered by Dr. Shobha KS, Reader Department of Periodontics on "Oral Hygiene Care" which began at 10 am. The lecture was highly appreciated by the audience of about 165 delegates comprising of postgraduates and staff. This was followed by a Certificate with Token of Appreciation and Oral B toothbrushes being provided to the Speaker, Dr Shobha KS. A certificate and token of appreciation were also awarded to the program coordinator Dr. Vinayak Raghunathan, Senior Lecturer, Department of Periodontics

Organized CDE program on 'Dive into the world of magnification', the use of magnification loupes and microscopy in periodontology conducted by Ziess

Report

The Department of Periodontology at The Oxford Dental College and Hospital held a one-day CDE program on microsurgery 'Dive into The World of Magnification' on June 28th 2019. In all, a total of 16 students took part in the program from the department of periodontology. A lecture followed by a demonstration were taught by Dr Vivek Hegde (Professor and Head, Department of Conservative & Endodontics, MA Rangoonwala College of Dental Sciences, Pune) and Dr Rashmi Hegde (Professor and Head, Department of Periodontics, MA Rangoonwala College of Dental Sciences, Pune). Dr Vivek and Dr Rashmi Hegde are acclaimed experts and course providers in the field of microsurgery. The lecture included microsurgical techniques, minimally invasive techniques, suturing techniques, and MIST around implants and cases treated by the speakers using microsurgery. Certificates were distributed to the course participants followed by a live demonstration.

Report

The Department conducted a certificate course for post-graduate students & interns by Dr. Sreekha A, On "Recent Advances in Post Endodontic Restoration". The program was held on 14/09/2019 with lecture followed by demonstration & hands on.

The restoration of endodontically treated teeth must be planned before initiating root canal treatment. Provisional (temporary) restorations during root canal treatment protect the root canal system from bacterial ingress and include zinc oxide eugenol or calcium sulphate preparations used for short periods and glass-ionomer or resin-modified glass-ionomers for longer interim periods. Ideally, a definitive core restoration should be placed at the time of obturation before removal of dental dam. The prognosis of mature teeth improves by conservation of tooth structure, avoiding posts whenever possible, avoiding gaps between gutta-percha and core restoration interface as well as full coverage restorations on anterior teeth and by the provision of cuspal coverage restorations on posterior teeth. Recent evidence suggests that conservative approaches, using direct-bonded resin-composite restorations, have promise for restoring largely intact posterior teeth. Fibber posts are associated with a higher incidence of restoration failure than metallic posts, but with a lower incidence of tooth fracture. When posts are indicated, preparations should be conservative, removing minimal radicular structures.

Website: www.theoxford.edu

THE OXFORD DENTAL COLLEGE, BANGALORE

OBJECTIVES :

LET'S GET CONNECTED AND THINK THE IMPORTANCE OF BELOW MENTIONED TOPICS IN TREATING CURVES:

- Knowing vs understanding the curvature of canals
- Importance of analyzing the radius of curvature and angle of curvature
- Anatomy and importance in treating curvatures till apex
- Theoretical understanding and practical implications of Pre-curving of files
- How handy are Hand files in negotiating the curves
- Selection of rotary files
- Negotiation of curves in middle and apical third
- Negotiation of different types of curves: S shape, J shape
- Torsional fatigue ,Flexural fatigue importance in curves
- Zone technique implications
- How to avoid Errors in treating Curved canals
- Cutting vs Noncutting tip
- Selection of rotary files in treating curved canals
- Pre-treatment evaluation of the teeth
- Importance of CBCT in analysing the curves
- Concept of apical width in curved canals
- Irrigation protocol
- Balanced force or watch winding technique
- Concept of taper in curved canals

SCHEDULE

Programmes for the day 2:

Time	Activity
9.00-10.30am	Lecture
10.30-10.45pm	Lecture
10.45pm-12.45pm	Demonstration
12.45-1.30pm	Lunch break
1.30-6.00pm	Hands on

For hands on contact Dr. Jay Kumar 8553538792

Venue – lecture: Auditorium

Hands on: PC O lab (5th floor)

Report

The Department conducted a two-day Certificate programmed for post-graduate students by Dr. Jaydev, on "The Curve"- management of severely curved canals on 06/12/2019 and 7/12/2019. The Session was attended by 24 Post Graduate Students.

The first day commenced with a lecture on the techniques, instruments used and management of extremely curved root canals and the demo. Hands on was conducted on the second day. This was attended by pgs. and staff of the dept.

Two-day workshop on Management of Extremely curved canals was aimed at making the attendees to understand the scientific concepts of curved canal management. This workshop functioned with the Main theme i.e., instrumentation of severely curved canals was more of Technique of science and less of Instrument specific All the scientific concepts was discussed in detail.

The objectives of the programmed was to

1. Know vs understand the curvature of canals,
2. Importance of analyzing the radius of curvature and angle of curvature
3. Anatomy and importance in treating curvatures till apex
4. Theoretical understanding and practical implications of Pre-curving of files
5. How handy are Hand files in negotiating the curves?
6. Selection of rotary files
7. Negotiation of curves in middle and apical third
8. Negotiation of different types of curves: S shape, J shape
9. Torsional fatigue, Flexural fatigue importance in curves

Report

"Classification and Diagnosis of Lymphoid Disorders – An Overview"

Objectives:

- ❖ To educate participants about Classification and Diagnosis of Lymphoid Disorders

Description:

The Department of Oral Pathology, Oxford Dental College conducted a CDE Programme on "Classification and Diagnosis of Lymphoid Disorders – An Overview" on 13.09.2019. A total of 35 UG students from Oxford Dental College participated in the CDE Programme.

During the course, the 2016 revision of the World Health Organization classification of lymphoid neoplasms was discussed. Oral cavity lymphomas represent the third most common malignancy in the oral cavity, surpassed by squamous cell carcinoma and malignancies of the salivary glands.

All the Clinical features, histopathology and IHC markers of these lesions were conversed and a lecture on the approach to diagnosis of these lesions was also deliberated with slide presentation at the end of the session.

During the course, participants actively participated in the Lecture. This was followed by the Valedictory function. The Organizing committee by Department of Oral Pathology and students who participated were appreciated for all the efforts put to make the event a great success.

Outcome Analysis – The participants learnt about the diagnostic criteria, together with biological and clinical correlates and future therapeutic advances of Lymphoid disorders.

Oral Hygiene Day Celebration and Oral B oration in association with Indian Dental Association

Report

Oral hygiene day is celebrated on 1st August, every year, in memory of the birth anniversary Dr G B Shankwalkar the doyen of Indian Periodontics. The Oral B oration in association with Indian Dental Association was held on the 1st of August 2019 in the auditorium of The Oxford Dental College and Hospital, Bangalore. The program comprised of a Oral B lecture delivered by Dr A.R. Pradeep, Dean and Director, The Oxford Dental college and Professor and Head, Department of Periodontics. The lecture was on "Modern day oral hygiene aids" which began at 9 am on the 1st of August 2019.

The lecture was highly appreciated by the audience of about 155 delegates comprising of undergraduates, postgraduates, interns and Heads of various dental departments. It was a highly interactive session with the audience. This was followed by a Certificate with Token of Appreciation to the Speaker. Oral B brushes and certificates were given to delegates.

Report

A CDE program was organized by the Department of Conservative Dentistry and Endodontics on the 18-02-2021 on the topic "Loupes in Dentistry".

A lecture was given on the same by Dr. Sirekha. A and students were explained about benefits of using loupes in treating different cases and their outcomes which was then followed by demonstration given to the students. There are three principal reasons for adopting magnifying loupes for operative dentistry: to enhance visualization of fine detail, to compensate for the loss of near vision (presbyopia) and to ensure maintenance of correct posture.

Report

REPORT OF THE PROGRAMME

THE OXFORD DENTAL COLLEGE AND HOSPITAL

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

The Department conducted a webinar by Dr. Manikya Arabolu on "Winning in Recovery".

The webinar was scheduled on 17.06.2021 on Microsoft Teams.

The programme was attended by many post graduate students and faculty members. The webinar started at 10:00 AM.

The Lecture explained various details about Covid-19 infection which included facts about the corona virus and its prevention in daily clinical practice. She highlighted the importance of its prevention by use of proper hand hygiene, use of PPE, sterilization of instruments, chairside disinfection protocol etc. She also explained the importance of the vaccine.

The participants were successfully able to understand the correct protocol which should be followed in the clinics for proper safety of the dentist, patient and dental staff.

The participants were given the certificate of participation for an effective participation and understanding of the topic.

Report

Objectives :

- ❖ To create awareness among the Participants about Machine learning and Artificial Intelligence and its application in pathology.
- ❖ To create awareness among the Participants about Machine learning and Artificial Intelligence and its application in healthcare.

Description:

The Department of Oral Pathology, Oxford Dental College conducted a CDE Programmed on "Ex-Machina -A peek into the future of Pathology and Healthcare" on 21st June 2021. A total of 47 students and Faculty from The Oxford Dental College participated in the Program.

With digitalization disrupting every industry, including healthcare, the ability to capture, share and deliver data is becoming a high priority. Machine learning, big data, and artificial intelligence (AI) can help address the challenges that vast amounts of data pose. Artificial intelligence has helped in analyzing data on patient visits to the clinic, medication prescribed, lab tests and procedures performed, for tumor detection and grading to name a few.

Dr. Shashidara R, the speaker for the webinar introduced AI and Machine learning. Following which he discussed how it has revolutionized the way pathology and healthcare can be benefited using AI. During the programmed, participants actively participated in the webinar followed by discussion and problem-solving situations. This was followed by the vote of thanks. The Organizing committee from the Department of Oral Pathology thanked all the students and faculty who participated and made the program a grand success.

Outcome Analysis – The participants learnt about Machine learning and artificial intelligence and its various application in healthcare and pathology.

Report of The Programme

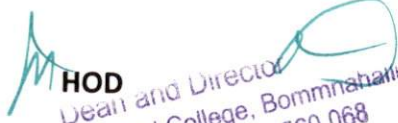

The Department of Periodontology conducted a Continuing Dental Education (CDE) Programmes on "Sinus Lift" for the post graduates' students and interns from the Department of Periodontology, by Dr. Praveen J.

The course was conducted on 22nd April 2021 at 10: 30 am. A total of 32 students which included 24 post graduate students and 8 interns from the Department of Periodontology attended the course. The participants assembled at 10:00 am in the seminar hall of Department of Periodontology, The Oxford Dental College for registration.

The course started at 10:30 am with an introduction and basic anatomy of maxillary sinus. The discussion further included the various technologies involved in sinus lift procedures both at the diagnostic and grafting level respectively. Various surgical procedures involved during direct and indirect sinus lift procedures were deliberated. The advantages, disadvantages and management during membrane perforation were thoroughly talked about.

The procedures were elaborately explained based on various clinical scenarios which would benefit the participants during their clinical practice.

Report

The Department of Periodontology conducted a Continuing Dental Education (CDE) programme on "Cytokine Storm & Covid 19" for the post graduate students and interns from the Department of Periodontology, by Dr AR Pradeep, Head of the Department, Dept of Periodontology, Dean & Director, The Oxford Dental College. The course was conducted on 7th July 2021 at 10:30 am. A total of 32 students which included 24 post graduate students and 8 interns from the Department of Periodontology attended the course.

The participants assembled at 10:00 am in the seminar hall of Department of Periodontology, The Oxford Dental College for registration. The course started at 01:30 pm with a brief introduction of current scenario of COVID 19 which was declared a pandemic in March 2020 by WHO. The discussions continued about cytokines which can be considered a double-edged weapon.

The Role of it in fight for & against the immunity of an individual causing the spread of the infection once the virus invades the host were talked about. Deliberate talks were given on the immunity and inflammatory components where cytokine plays an important role. Cytokine storm as the name suggest was talked about and its relation to COVID 19 were discussed.

The biological plausibility about the sudden severity of the symptoms on few days later on the infected individuals were discussed. The treatment modalities how to fight back the storm were elaborately discussed. The discussion was important for the participants to be aware of the current scenario and also to know the various factors, one of which being Cytokine storm which plays a pivotal role in the COVID 19 contagious viral infection.
