Summary:

Teaching curriculum for dentistry comprises of four years of duration. The pre-clinical training program commences in the second year of dentistry for the undergraduate students. The main purpose of pre-clinical training is to make the students trained to various techniques and practices. The main purpose of pre-clinical training is for the potential benefit of the student. The students start the training process on the plaster models where they understand how to use the basic hand instruments and then on Typhodont. Students are trained right from the beginning to use all the dental instruments so that they get a good hand of it by the time they reach the clinics.

The pre-clinical endodontic lab is very well equipped with phantom heads where the students can get a simulation that they are working on real patients. The entire pre-clinical program is assessed by the teachers who guide and train the students so that they are ready to enter the clinical setup.

The post graduate pre-clinical training program is conducted in the first six months of their MDS course. The students are guided and trained extensively in the department of Orthodontics, pedodontics, prosthodontics, conservative and endodontics. The students are trained on various aspects of using materials, wire bending, casting, root canals etc. The students are made to practice on both typhodont and natural teeth. The teachers guide them throughout the training program and which is overall supervised by the respective Head of the departments. The main objective is to provide an environment in which the students can practice the highest level of skills before entering the clinical setup.

Pre-clinical phantom heads- 100

The department also has ceramic lab consisting of casting equipments including ceramic unit on which students will be working at pre-clinical and clinical level.

The dental curriculum is designed to educate students to achieve a highest level of clinical competence in order to provide high quality dental treatment.

In prosthodontic training clinical simulation exercises are of great importance for understanding the art and science. Pre-clinical training program should not only focus on hand work simulation expertise but also to do necessary adjustment according to real time clinical situation. Simulator plays an important role in successful completion of treatment strategies. The training program should be presenting with use of instruments, knowledge, scientific rationale, manual dexterity and dental material knowledge.

1. Pre-clinical lab: Demonstration of arrangement of artificial teeth on mean value articulator for undergraduate students and semi-adjustable articulator for PG students mounted in class I, class II and class III situations along with waxing, carving and polishing to be accomplished.
2. Surveying of partial edentulous model and preparing modified edentulous cast.
3. Preparation of wax patterns, spruing, casting and finishing to be demonstrated to student's batch wise.

In phantom head lab: preparation of models of various tooth preparations to receive crown and bridges for fixed partial dentures are demonstrated.

Preparation of wax patterns for minimum of 3 unit fixed partial dentures and investing, casting and porcelain facing for batches of students are demonstrated the porcelain laminates and smile design are also included in clinical simulator exercise.

The Department of Prosthodontics utilizes semi- adjustable and fully adjustable articulators to orient the maxilla to cranium and subsequently the mandible to maxilla. The other departments which make use of these articulators are Department of Orthodontics and Oral Surgery for the orthognathic surgery cases.

Activity Report

Title: Visit to Public Health Institute

Objective: To gain knowledge about the causative agents in disease outbreaks, food adulteration and food safety, how to test physical and chemical characteristics of water.

Date: 21.12.2020

Time: 10.00 am to 02.00 pm

Location: Sheshadri Road

Organized by: Department of Public Health Dentistry

Audience: Post graduate and undergraduate students

Speaker: Mrs. Saraswati

Method adopted: Lecture

Materials used: Live Demonstrations, Lectures

Description: Under the aegis of Department of Public health dentistry, the Public Health Institute visit was done to gain knowledge on food adulteration and the steps taken by the Government to improve health care for the community. After paying the fee of Rs 200, students were briefed regarding the establishment of Public Health Institute. Following this, step-by-step a detailed study of the Public Health Institute was done. Demonstration was given to make the students aware how are the commonly used food products such as Toor dal and tea being adulterated. The bacteriological section of the institute deals with outbreaks of communicable diseases such as Cholera, Typhoid and Food poisoning which are pandemic in nature. Various media, for bacteriological culture were shown, which included Venkatraman - Ramakrishnan (VR) medium, Cary Blair medium, Alkaline peptone water, Monsur's Taurocholate tellurite peptone water etc. Students were briefed about food poisoning. From the field visit students learned that adequate precautions should be taken by the consumer at the time of purchase of any food products.

Activity Report

Title: Visit to Primary Health Centre

Objective: To understand the structure and functioning of a Primary Health Centre.

Date: 30.01.2021

Time: 10.00 am to 01.00 pm

Location: Begur main road, Begur

Organized by: The Department of Public health Dentistry

Audience: Post graduate and undergraduate students

Speaker: Dr. Smitha Reddy

Method adopted: Lecture

Materials used: live demonstrations, lectures

Description: Primary Health Centre is the first contact point between the village community and the medical officer and it provides the curative, preventive and promotive services to the people. A team of postgraduate students and undergraduate students visited the Begur PHC on 30/01/2021 at 10.00am. After reaching the PHC, we met the block health officer. She accompanied us throughout the PHC and explained in detail regarding its functioning. The PHC consists of a laboratory, Out Patient department, pharmacy, maternity ward, general ward, office, records room, health education room and immunization room. The various departments in the PHC includes Pathology, Paediatrics, Gynaecology, Maternal and child health, General ward, Maternal and paediatric ward and Drug counter. The outpatient department works from 9:00 a.m. to 1: 00 p.m. and 1:45 p.m. to 4.30 p.m. with an average of 150 patients per day. The PHC have 9 sub centres in and around Begur. Total immunization done in a month is around 80-120. Almost 400-500 outpatients visit the PHC in a month. Immunization is done on every Thursday in the Begur PHC. Family planning, ante-natal and post-natal care procedures are done on Friday's (IUD).

Activity Report

Title: Visit to slum

Objective: To understand the sanitation, waste disposal, hygiene practices and availability of emergency health services for slum residents, thereby providing health education for improving their overall health conditions.

Date: 23/2/2021

Time: 3:30 pm-4:30 pm.

Location: NGR Layout slum, Roopena Agrahara, Bengaluru.

Organized by: Department of Public Health Dentistry

Participants: Seven Post graduate students and two Interns.

Speaker: Jayashankar, local resident.

Method adopted: Verbal orientation on facilities and problems being faced by slum residents.

Description: We visited NGR slum near Roopena Agrahara, Bangalore on 23/2/2021 at 3:30 pm. Slum is inhabited by about 4000 people, out of which 1600 are children and rest adults. There is a total of 400 houses in that slum. Some of them are permanent houses that are structured, mud houses covered with thin cement sheets, straw and plastics sheets. Residents said Kauveri river water is supplied through pipelines at lane end and there is no scarcity of water. The slum is equipped with an Anganwadi Centre and inhabitants of that area visit Primary Health Centre in case of health issues. There are no government schools for girls in that area which forces the residents to send their children to nearby private and public schools. The residents of this slum were not aware of the government programs being carried out for the upliftment of the slums. Literacy rate of this community was average because of which they remain unaware of any of the government programs.

Activity Report

Title: Visit to Blood Bank

Objective: To create awareness for the students about the importance of blood donation, criteria for donating blood as well as different components of blood.

Date: 27/2/21

Time: 11:30 am - 1:00 pm

Location: NIMHANS, Hombegowda Nagar, Bengaluru

Organized by: Our team consisted of a faculty member and 8 dentists Pursuing post-graduation, along with 8 dentists Pursuing under graduation in the Department of Public Health Dentistry.

Participants: 1 staff in charge, 6 Post graduates, 5 Under graduates and 2 Interns.

Speaker: Dr. Parmatma Prasad Tripathi, Prof, Department of Transfusion medicine and Haematology

Method adopted: Verbal orientation on blood bank/hands on experience/Demonstration.

Description: We visited NIMHANS, one of the biggest Blood Bank in Bengaluru on 27/2/21 at 11:30 am. The brief blood bank orientation was delivered by Prof, Dr. Parmatma, who explained about the Transfusion medicine and haematology department. The unit is well equipped. We were thoroughly introduced to the components of blood and how to draw blood, about separation of blood, storage and transportation of blood.

Today, Blood banks collect blood and separate it into various components such as red blood cells, plasma and platelets. Each component is generally transfused to a different individual, each with different needs. RBC carry oxygen, platelets help in blood clot and plasma has specific proteins that allow proper regulation of coagulation and healing.

Types of Blood Bags:

Single blood bag: For whole blood collection. The bag contains CPDA solution.

Double blood bag: For whole blood collection. Separation of 2 different components obtained through the process of centrifugation and extraction.

Triple blood bag: Contains SAGM, for whole blood collection.

As a Public Health Dentist, we should know about blood banking system as the need for blood is constant, so is the need for donations. Every day, all the hospitals and clinics in India need blood and blood components to treat patients, since most surgical interventions and a great number of medical procedures require blood transfusion.

Activity Report

Title: Visit to Forensic Science Lab

Objective: To gain knowledge about the functioning of forensic science lab.

Date: 20.03.2021

Time: 10.30 am to 02.00 pm

Location: Madiwala around 2 kms from The Oxford Dental college, Bommanahalli.

Organized by: Department of Public Health Dentistry

Audience: Post graduate and undergraduate students

Speaker: Mr. Vinod, Professor and HOD Dept of DNA Analysis

Method adopted: Lecture

Materials used: demonstration in various labs

Description: Under the aegis of Department of Public Health Dentistry, the Forensic Science Lab visit was done to know about forensic sciences and the functioning of the forensic lab. A group of undergraduate and post graduate students started at around 9:00 am from the Oxford Dental College and reached the Forensic Science lab by 9:30 am. Mr. Vinod, Professor and HOD Dept of DNA Analysis, gave a brief introduction of the Forensic Science Lab. It was told that the word forensic comes from the Latin term forensic, meaning "of or before the forum". The history of the term originates from Roman times, during which a criminal charge meant presenting the case before a group of public individuals in the forum.

The forensic lab consists of different departments which includes, chemistry lab, fire arms department, toxicology department, cyber forensic department, questioned documents section, psychology section, DNA analysis section, photography section. Concerned staffs of each department explained everything about the functioning of each lab. The major cases solved in the chemistry lab included narcotics, home-made liquor, cheating cases, acid cases, explosives and synthetic drugs. The fire arms department enlightened the students about the various types of guns, pistols, bullets and also about various gun injuries. Likewise, students were enlightened about the functioning of all the different departments. Being the only forensic department in Bangalore the lab holds great responsibility in maintaining standards. Various number of cases ranging from 100-200 are examined and maintaining transparency is utmost important. The work done by the police department in showing interest and maintaining integrity is commendable.

Title: Virtual tour of Cell Culture Laboratory , CIDS, Virajpet

Objectives:

- To train the undergraduate students in the basics of Cell culture
- To make the UGs understand the applications of Cell culture in Research and Clinical Dentistry

Date: 5/05/2021

Time: 10.00 am -12.00 pm

Location: Cell Culture Laboratory, CIDS, Virajpet

Organized by: Department of Oral Pathology and Microbiology

Audience: 3rd BDS students

Resource person: Dr. Shashidara R

Method adopted: Visual learning and Verbal Orientation / Demonstration

Description: The Department of Oral Pathology, Oxford Dental College organized a virtual Field visit to the Cell Culture Laboratory, CIDS, Virajpet on 5/5/2019. A total of 20 undergraduate students from Oxford Dental College were educated on the basics of Cell culture. They were also guided on the application of Cell culture in Research and Clinical Dentistry.

During the visit, students actively participated and successfully ended the visit with positive feedback of all the participants. The Organizing committee by Department of Oral pathology and students who participated were appreciated for all the efforts put to make the event a great success.

MDS

Activity report

Title: visit to JSD Techno Dental (CBCT)

Objective: To understand the concepts and functioning modalities of CBCT using various working parameters of the cone beam computed tomography machine.

Date: 26-02-2021

Time: 1:00 am - 3:00 pm

Location: JSD Techno Dental (CBCT), Jayanagar, Bengaluru.

Organized by: Department of Oral Medicine and Radiology

Participants: 1 staff in charge and 4 Post graduate students.

Speaker: Dr. Suchinder

Method adapted: Visual learning and verbal orientation with working demonstration were given by the radiologist imparting knowledge about CBCT machine.

Description: we visited the JSD Techno Dental, one of the biggest CBCT diagnostic centers in Bengaluru on 26/2/2021 at 1 pm. They briefed us about the usage of the "ORTHOPHOS XG" machine which was installed at the imaging center. The single machine was designed with a prospectus, to be simultaneously used for taking lateral cephalometric radiographs, OPG and CBCT scans. It's usage in various branch of dentistry was elaborated upon likewise for the detection of Endo - Perio lesions, bone loss, in planning for orthodontic treatment and also used for better evaluation of bony lesions persisting in the jaw etc. This was followed by a questionnaire session in which, all the post graduates were given chance to raise their doubts. Overall it was an interactive session which provided a platform much needed for better understanding about the CBCT machine.

As an Oral Medicine and Radiology specialist we should know about CBCT working principle with various parameters as it is very much needed in the diagnosis of pathological conditions associated with orofacial region. Every day all the departments and also the private practitioners depend on the CBCT images for the diagnosis and the treatment plan of any associated pathology. Since most surgical interventions in any bony pathology, implant placement, impacted molar or canine and Endo - Perio lesions requires evaluation of CBCT images.

Activity report

Title: To Digital Lab "Dentsply Sirona St Marks Road Ashok Nagar, Bengaluru

Objective: To gain thorough knowledge of the existing as well as emerging maxillofacial imaging modalities, precisely being the latest combination of CBCT, OPG and Lateral CEPH machines in market along with its working soft wares.

Date: 18-03-2021

Time: 1:30 pm - 4:30 pm

Location: Dentsply Sirona St Marks Road Ashok Nagar, Bengaluru.

Organized by: Department of Oral Medicine and Radiology

Participants: 2 staff in charge and 3 Post graduate students.

Speaker: Dr Hari Suresh Prabhu.

Method adapted: A digitalized -visual method was adapted by our eminent speaker Dr. Hari Suresh Prabhu, a maxillofacial radiologist by profession and a specialist in imaging and CAD-CAM.

- **Description:** The entire session was divided into two halves. During the first session a brief description was given about the different 2D-3D imaging models - comprising of CBCT, Lateral Ceph, OPG'S manufactured and maintained by Dentsply Sirona, a German based manufacturing company of dental products and technologies.
- In depth working and key specifications about the four - New Orthophos society models namely -Orthophos E, Orthophos S, Orthophos SL and Axesos was explained which is offering additional features like -autofocus, Direct Conversion Sensor (DCS) for unparalleled sharp images even at lowest dose, auto-positioner for correct inclination of patient's head and high definition.
- The second session was based on- latest CBCT software being used currently like Galilo implant software, offering inbuilt reporting and video adaptation of the patient's report, Sleep Apnea software for planning prosthesis, Prosthetically driven implant planning where the CAD-CAM data is merged with CBCT, for better evaluation and implant placement.
- Followed by live demonstration of the working of the latest Orthophos Axeos CBCT machine, dental chair functioning, intra -oral scanners and CAD -CAM machines.
- Lastly a questionnaire session was conducted, in which the post graduates could raise their respective queries regarding the same.

Activity Report

Department of Oral Surgery

Field Visit to Department of Microbiology,

Date: 11-09-2020

Venue: The Oxford Medical College, Attibele

Objective of the visit: To improve knowledge of microbiology in students

Staff Incharge: Dr. Santosh B S

Brief Report: Dr. Rajini, Head of the Department, Department of microbiology gave a tour of department of microbiology, explained importance of microbes in general medical and oral surgery practice, methods of sterilisation and disinfection, instruments and materials used in microbiology, different methods of staining techniques, identification of microorganisms under different microscopes, specific tests for different microorganisms, microorganisms causing infections and management and prevention of it, nosocomial infections and its prevention and management, recent guidelines for covid-19 prevention and its management, recent advances in microbiology.

Field Visit to Central Sterile Services Department (CSSD)

Department of Microbiology,

Date: 18/01/2021

Venue: The Oxford Medical College, Attibele

Objective of the visit: To improve knowledge of sterilization in students

Staff Incharge: Dr. Santosh B S

Brief Report: Dr. Rajini, Head of the Department, Department of microbiology gave a tour of central sterile services department, explained what is CSSD, importance of sterilization and disinfection in general medical and oral surgery practice, methods of sterilisation and disinfection, different techniques of sterilisation for specific instruments and materials, categories of different wastes and disposal of it, importance of disposal of wastes, maintenance of hospital cleanliness and waste management.

Activity Report

Title: Visit to Oxford Medical College

Objective of the visit: The objective of the field visit is to give the students brief insight into the various tests and techniques used in microbiology laboratory.

Date: 03/03/2021

Time: 9.30 am

Venue: The Oxford Medical College and Hospital & Research Centre, Attibele.

Organisers: Department of Microbiology, The Oxford Medical College and Hospital

Participants: First year post graduate students

Staff In charge: Dr. Archana. S

Method adopted: Verbal orientation and demonstration

Description: The Field visit to The Oxford Medical College and Hospital & Research Centre was scheduled on 03/03/2021. The PG students from The Oxford Dental college boarded the bus arranged by the college at 8:30 am and reached The Oxford Medical College and Hospital & Research Centre at 9:30 am. The field visit began by visiting the laboratories of Microbiology department located in the premises of the Hospital campus, where the students were welcomed by the Head of the Department of Microbiology Dr. Rajini. M.

The students were given brief insight into sample collection, processing of samples, different types of tests performed to orientation on RT-PCR technique, blood sample collection.

In Microbiology lab-

- I. Bacteriology- culture method, identification tests (biochemical reactions) and sensitivity plates were explained and shown.
Juuu766iy8887y897py78yo9r7598
- II. Serology- various ICT (immunochromatographic tests) like HIV, HB₁AG, HCV, MALARIA, DENGUE.
- III. Mycology- fungal cultures were shown and explained about the culture morphology and pigment produced. Fluorescent stained fungal elements from skin scrapping were shown.
- IV. RT-PCR lab- Unidirectional flow of sample was explained. Donning and doffing area were shown, steps of extraction of RNA, template addition, addition of positive control were explained. Amplification room was shown and Thermosphere Quant studio 5 RT-PCR machine demo was given.

Activity Report

Title: Visit to CBCT centre

Objective: To enlighten the postgraduate students about the diagnostic importance of CBCT in the field of Endodontics.

Date: 10.03.2021

Time: 1:00 pm - 3:00 pm

Location: Kanva Diagnostics, Nagarbhavi, Bengaluru.

Organized by: Department of Conservative Dentistry and Endodontics.

Participants: II YEAR MDS students.

Speaker: Dr. Vinitra Vasana, Consultant Oral and Maxillofacial Radiologist.

Method adopted: Verbal orientation on CBCT and demonstration.

Description: We visited Kanva Diagnostics, one of the biggest diagnostic centres in Bengaluru on 10.03.2021 at 01:00 pm. The brief CBCT orientation was done by Dr. Vinitra, who explained about its potential applications in endodontics as well as in other fields of dentistry. She had also highlighted the advantages of CBCT over conventional radiography. She explained about the CBCT hardware which consists of an X-ray source and detector, or sensor, mounted on a rotating gantry. She described about reconstruction of the CBCT images which can be displayed in a variety of ways. The images of the area of interest can be visualized in three orthogonal planes i.e., axial, sagittal and coronal, simultaneously, affording the clinician a truly three-dimensional view of the area of interest.

Activity Report

Title: Visit to Department of Biotechnology, The Oxford Science College, HSR Layout, Bangalore.

Objective: To create awareness for the students about the equipment and facilities available in the Department of Biotechnology, The Oxford Science College, Bangalore.

Date: 12/3/2021

Time: 11:00 am to 1:30pm.

Location: The Oxford College of Science, HSR Layout, Bangalore.

Organised by: Department of Periodontics, Bangalore.

Participants: 1 staff in-charge (Dr Amita Coutinho) and 16 Post-graduate students.

Speaker: Ms. Kavisa Ghosh, Assistant Professor, Department of Biotechnology, The Oxford College of Science, Bangalore.

Method adopted: Verbal orientation on equipment and facilities in The Department of Biotechnology, The Oxford Science College, HSR Layout, Bangalore.

Description: We visited The Department of Biotechnology, The Oxford Science College, HSR Layout, Bangalore on 12/3/2021 at 11:00 am. On entering the college, the COVID guidelines protocol was followed (infra-red temperature check was done for all the participants, wearing of face- masks, use of hand sanitizers and maintenance of 6 feet social distance was followed through the visit). A brief theoretical knowledge was given by the speaker, Dr Kavisa Ghosh through a power-point presentation. After an hour of presentation, we were oriented through the laboratory and were shown the various equipment's present such as ELISA, PCR, Western Blot machine, Fluorescent electron microscope, Airflow machine, electrophoresis unit, fluorometer, multiple freezers for storage of samples, haemocytometer, calorimeter, pH meter were among some of the major equipment's present. We were also shown the cell and tissue culture lab.

The students clarified their doubts and were enriched with the knowledge they received from the visit.

Activity Report

Title: Visit to Dental art Laboratory, Bangalore

Date: 22/2/2021

Time: 08:00 am - 06:00 pm

Venue: Dental art Laboratory, Bangalore

Organized by: Department of Prosthodontics, The Oxford Dental College.

Objective of the visit: To visit and learn the laboratory skills

Staff In charge: Dr. Malathi Dayalan

Speaker: M

No. of Participants: 8

Method adopted: Lectures and seminars, demonstrations, hands-on

Brief Report: The students of second year MDS, Batch 2019 -2022 had attended a field visit on Dental art Laboratory, held at 22/2/2021, Jaya Prakash Nagar, Bangalore. The team was very informative and explained each and every step involved in the fabrication of the prosthesis. Different techniques were explained such as 3-D printing or additive manufacturing which is a process of making three dimensional solid objects from a digital file. The technology used is the photopolymerization, a technique that involves the solidification of photo-sensitive resin by means of a UV light. It is used by different 3D printing processes such as: Stereolithography (SLA) which uses a vat of curable photopolymer resin. Another technique used in the lab is the Subtractive manufacturing (or CNC) which is the process of starting with more material that is needed in sheet, rod or block form, and selectively removing material that is not required until the final shape emerges. A milling machine cutting/hollowing out a piece of metal or plastic is an example of subtractive manufacturing. This field visit was very helpful for upgrading clinical scenario for future practice.

Activity Report

Title: Visit to Confident Dental Laboratory Pvt Ltd, Bangalore

Date: 22/3/2021

Time: 09:30 am - 03:30 pm

Venue: Confident Dental Laboratory Pvt Ltd, Whitefield, Bangalore

Organized by: Department of Prosthodontics, The Oxford Dental College.

Objective of the visit: To visit and learn the laboratory skills

Staff In charge: Dr. Malathi Dayalan.

Speaker: Dr. Shivashankar M

No. of Participants: 8

Method adopted: Lectures and seminars, demonstrations, hands-on

Brief Report: The students of second year MDS, Batch 2019 -2022 had attended a field visit on Confident Dental Laboratory Pvt Ltd, Bangalore, held at 22/3/2021 Whitefield, Bangalore. Confident dental lab field visit gave a complete coverage on the various prosthodontic lab procedures that is done day in and day out to fabricate the various prostheses. It also provided us an insight into the details of SLM (Selective Laser Melting) technique, right from scanning the data to design the prosthesis and then feeding this data to CAM machine to achieve the desired prosthesis. It also gave us an idea of how the different types of works that are collected from various dental labs are segregated and disinfected, sent to particular departments based on the work to be carried out, i.e. be it metal or ceramic works. It also provided us knowledge on digital fabrication of prosthesis (for example, crowns and bridges) and how a typical milling machine works. It was an eye opener for all of us to capture minute details of how the various prostheses are fabricated so delicately.

Title: Specially-abled children school visit

Objective: The objective of the visit was to make students understand the power of empathy, integration, empowerment to a special section of society who are special for living their lives beautifully with self-confidence, dignity and self-control.

To empower visually impaired, disabled and underprivileged people through developmental initiatives focusing on educational, social, economic, cultural and technological aspects.

To improve oral health knowledge and literacy of the specially-abled individuals

Date: 15/07/2020

Time: 9.30 am to 03.00 pm

Location: HSR Layout, Bengaluru.

Organized by: Department of Public Health Dentistry

Participants: Post graduate and undergraduate students

Speaker: Dr. David Coutinho

Name of the organization: Samarthanam Trust for the Disabled, Bengaluru

Description: Under the aegis of Department of Public health dentistry, a special school visit was organized on 15th July, 2020.

Samarthanam Trust stands to be a complete solution provider by supporting education and livelihood needs of persons with disabilities and those from underprivileged backgrounds.

The caretakers and the staff assisted the students in the institution. At the time of the field visit, around 100 special needs individuals were present in the school.

Samarthanam facilitates free education at Primary and High School levels and also offers support for college education. Samarthanam's Special School offers education to children with intellectual disabilities. To ensure holistic development of the students, Samarthanam facilitates free tuition, accommodation, study support, extracurricular activities, accessible infrastructure, study material in digital format, and so on.

The centers offer industry specific market driven training in different sectors like Hospitality, Retail, Garments, IT & ITES, Entrepreneurship and Business Management Skills. Technical and sector-based skill training, like training in BPO and Call Centre operations, are designed to suit the needs of the industry. Training categories include tele-calling, communication skills, accent training, customer service, soft skills, client relations and conflict management. The training curriculum has been developed in consultation with industry experts to meet the market demand. The training, food and accommodation is provided free of cost and post training, the candidates are provided with placement and post placement support. Each LRC is accompanied with separate hostel facility for boys and girls providing free food and accommodation.

The Skill Development Centres are equipped with accessible infrastructure to support persons with disabilities. Sports is greatly promoted at Samarthanam Schools, beneficiaries from every initiative show interest in being a part of the sporting activities. It is a well-maintained clinic and a lot of learning experience was gained by the visit.

Activity Report

Title: Visit to Public Health Institute

Objective: To gain knowledge about the causative agents in disease outbreaks, food adulteration and food safety, how to test physical and chemical characteristics of water.

Date: 21.12.2020

Time: 10.00 am to 02.00 pm

Location: Sheshadri Road

Organized by: Department of Public Health Dentistry

Audience: Post graduate and undergraduate students

Speaker: Mrs. Saraswati

Method adopted: Lecture

Materials used: live demonstrations, lectures

Description: Under the aegis of Department of Public health dentistry, the Public Health Institute visit was done to gain knowledge on food adulteration and the steps taken by the Government to improve health care for the community. After paying the fee of Rs 200, students were briefed regarding the establishment of Public Health Institute. Following this, step-by-step a detailed study of the Public Health Institute was done. Demonstration was given to make the students aware how are the commonly used food products such as Toor dal and tea being adulterated. The bacteriological section of the institute deals with outbreaks of communicable diseases such as Cholera, Typhoid and Food poisoning which are pandemic in nature. Various media, for bacteriological culture were shown, which included Venkatraman - Ramakrishnan (VR) medium, Cary Blair medium, Alkaline peptone water, Monsur's Taurocholate tellurite peptone water etc. Students were briefed about food poisoning. From the field visit students learned that adequate precautions should be taken by the consumer at the time of purchase of any food products.

Title: Visit to Primary Health Centre

Objective: To understand the structure and functioning of a Primary Health Centre.

Date: 30.01.2021

Time: 10.00 am to 01.00 pm

Location: Begur main Road, Begur

Organized by: The Department of Public health Dentistry

Audience: Post graduate and undergraduate students

Speaker: Dr. Smitha Reddy

Method adopted: Lecture

Materials used: live demonstrations, lectures

Description: Primary Health Centre is the first contact point between the village community and the medical officer and it provides the curative, preventive and promotive services to the people. A team of postgraduate students and undergraduate students visited the Begur PHC on 30/01/2021 at 10.00am. After reaching the PHC, we met the block health officer. She accompanied us throughout the PHC and explained in detail regarding its functioning. The PHC consists of a laboratory, Out Patient department, pharmacy, maternity ward, general ward, office, records room, health education room and immunization room. The various departments in the PHC includes Pathology, Pediatrics, Gynecology, Maternal and child health, General ward, Maternal and pediatric ward and Drug counter. The outpatient department works from 9:00 a.m. to 1: 00 p.m. and 1:45 p.m. to 4.30 p.m. with an average of 150 patients per day. The PHC have 9 sub centres in and around Begur. Total immunization done in a month is around 80-120. Almost 400-500 outpatients visit the PHC in a month. Immunization is done on every Thursday in the Begur PHC. Family planning, ante-natal and post-natal care procedures are done on Friday's (IUD).

Activity Report

Title: Blind School Visit

Objective: To make students understand the power of empathy, integration, empowerment to a special section of society who are special for living their lives beautifully with self-confidence, dignity and self-control.

To empower visually impaired, disabled and underprivileged people through developmental initiatives focusing on educational, social, economic, cultural and technological aspects.

To improve oral health knowledge and literacy of the specially-abled individuals

Date: 04/02/2021

Time: 9.30 am to 03.00 pm

Location: Jeevan Bheema Nagar, Bengaluru.

Organized by: Department of Public Health Dentistry

Participants: Post graduate and undergraduate students

Speaker: Dr. David Coutinho

Name of the organization: National Association for the Blind, Bengaluru

Description: Under the aegis of Department of Public health dentistry, a blind school visit was organized on February 02, 2021. The objective of the visit was to make students understand the power of empathy, integration, empowerment to a special section of society who are special for living their lives beautifully with self-confidence, dignity and self-control.

The permissions were obtained not only for conducting field visit along with screening and treatment camp on the regular basis with mobile dental van. The authorities and the staff assisted the students in the institution. At the time of the field visit around 120 visually impaired individuals were present in the institution.

The services for the visually challenged included training programmes that equipped them with confidence, self-reliance and the skills necessary to earn a livelihood. The boarders in the NAB underwent training in computer, technical, machinery handling, communication and soft skills, Braille reading and writing, competitive exam preparations and mobility training program for a period of 6 months. All the students in the institution were under same dietary practice and time table for the entire duration of the course provided by the institution. NAB's mission is to champion the cause of the visually challenged in Karnataka and enable them to live their lives confidently, independently and with dignity through economic rehabilitation.

The visually impaired individuals were completely focused on their respective tasks and felt overwhelmed by the presence of students asking them their queries. They realized that we are blessed and we can bless many others by giving love, support, empathy and empowerment. It is a well-maintained clinic and a lot of learning experience was gained by the visit.

Activity Report

Title: Visit to slum

Objective: To understand the sanitation, waste disposal, hygiene practices and availability of emergency health services for slum residents, thereby providing health education for improving their overall health conditions.

Date: 23/2/2021

Time: 3:30 pm -4:30 pm.

Location: NGR Layout slum, Roopena Agrahara, Bengaluru.

Organized by: Department of Public Health Dentistry

Participants: Seven Post graduate students and two Interns.

Speaker: Jayashankar, local resident.

Method adopted: Verbal orientation on facilities and problems being faced by slum residents.

Description: We visited NGR slum near Roopena Agrahara, Bangalore on 23/2/2021 at 3:30 pm. Slum is inhabited by about 4000 people, out of which 1600 are children and rest adults. There is a total of 400 houses in that slum. Some of them are permanent houses that are structured, mud houses covered with thin cement sheets, straw and plastics sheets. Residents said Kauveri River water is supplied through pipelines at lane end and there is no scarcity of water. The slum is equipped with an Anganwadi Centre and inhabitants of that area visit Primary Health Centre in case of health issues. There are no government schools for girls in that area which forces the residents to send their children to nearby private and public schools. The residents of this slum were not aware of the government programs being carried out for the up liftment of the slums. Literacy rate of this community was average because of which they remain unaware of any of the government programs.

Activity Report

Title: Visit to Blood Bank

Objective: To create awareness for the students about the importance of blood donation, criteria for donating blood as well as different components of blood.

Date: 27/2/21

Time: 11:30 am - 1:00 pm

Location: NIMHANS, Hombegowda Nagar, Bengaluru

Organized by: Our team consisted of a faculty member and 8 dentists pursuing post-graduation, along with 8 dentists pursuing under graduation in the Department of Public Health Dentistry.

Participants: 1 staff incharge, 6 Post graduates, 5 Under graduates and 2 Interns.

Speaker: Dr. Parmatma Prasad Tripathi, Prof, Department of Transfusion medicine and Haematology

Method adopted: Verbal orientation on blood bank/hands on experience/Demonstration.

Description: We visited NIMHANS, one of the biggest Blood Bank in Bengaluru on 27/2/21 at 11:30AM. The brief blood bank orientation was delivered by Prof, Dr. Parmatma, who explained about the Transfusion medicine and haematology department. The unit is well equipped. We were thoroughly introduced to the components of blood and how to draw blood, about separation of blood, storage and transportation of blood.

Today, Blood banks collect blood and separate it into various components such as red blood cells, plasma and platelets. Each component is generally transfused to a different individual, each with different needs. RBC carry oxygen, platelets help in blood clot and plasma has specific proteins that allow proper regulation of coagulation and healing.

Types of Blood Bags:

Single blood bag: For whole blood collection. The bag contains CPDA solution.

Double blood bag: For whole blood collection. Separation of 2 different components obtained through the process of centrifugation and extraction.

Triple blood bag: Contains SAGM, for whole blood collection.

As a Public Health Dentist, we should know about blood banking system as the need for blood is constant, so is the need for donations. Every day, all the hospitals and clinics in India need blood and blood components to treat patients, since most surgical interventions and a great number of medical procedures require blood transfusion.

Activity Report

Title: Visit to Dental clinic

Objective: To understand the sanitation, treatment, sterilization, working protocol, hygiene practices, biomedical waste disposal and management.

Date: 16/3/2021

Time: 10:00 am-11:30 am.

Location: Dr. A. N Reddy's Dental Clinic, HSR Layout, 3rd sector, Bengaluru.

Organized by: Department of Public Health Dentistry

Participants: Eight Post graduate students.

Speaker: Dr. A. N Reddy, Dental surgeon.

Method adopted: Verbal orientation on dental clinic/ demonstration.

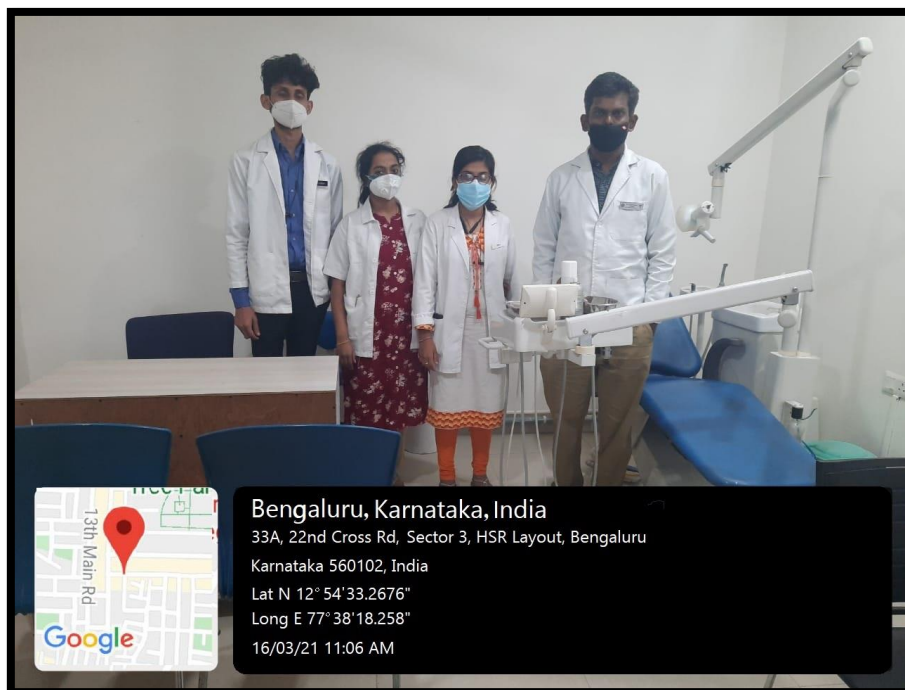

Description: We visited Dr. A. N Reddy's Dental Clinic, HSR Layout, 3rd sector, Bengaluru on 16/3/2021 at 10:00 am. The clinic works from 10:00 am to 1:00 pm and 5:00 pm to 7:30 pm. Dr. A. N Reddy has explained about his clinic from reception which plays an important role in maintaining dental records of patients, appointments, treatments provided. Sterilization of dental instruments by autoclave and UV chamber, maintenance of hygiene practices is by disinfection of room, dental chairs. The clinic is equipped with extraction, scaling and restorative instruments arranged orderly wise. Dental materials like cements, trays, sealants, were shown along with the method of storage. Sanitary measures like proper hand washing technique were demonstrated. Various ongoing treatments were shown with advanced techniques and properly explained. Biomedical waste management and disposal was shown with color coded bags and dustbins along with the type of material to be disposed into it through posters on wall. Disposal is carried out for every 3 days.

Activity Report

Title: Visit to forensic science lab

Objective: to gain knowledge about the functioning of forensic science lab.

Date: 20.03.2021

Time: 10.30 am to 02.00 pm

Location: Madiwala around 2 kms from the oxford dental college, Bommanahalli.

Organized by: department of public health dentistry

Audience: post graduate and undergraduate students

Speaker: Mr. Vinod, professor and HOD dept of DNA analysis

Method adopted: lecture

Materials used: demonstration in various labs

Description: under the aegis of department of public health dentistry, the forensic science lab visit was done to know about forensic sciences and the functioning of the forensic lab. A group of undergraduate and post graduate students started at around 9:00 am from the oxford dental college and reached the forensic science lab by 9:30 am. Mr. Vinod, professor and HOD dept of DNA analysis, gave a brief introduction of the forensic science lab. It was told that the word forensic comes from the Latin term forensic, meaning "of or before the forum". The history of the term originates from roman times, during which a criminal charge meant presenting the case before a group of public individuals in the forum. The forensic lab consists of different departments which includes, chemistry lab, fire arms department, toxicology department, cyber forensic department, questioned documents section, psychology section, DNA analysis section, photography section. Concerned staffs of each department explained everything about the functioning of each lab. The major cases solved in the chemistry lab included narcotics, home-made liquor, cheating cases, acid cases, explosives and synthetic drugs. The fire arms department enlightened the students about the various types of guns, pistols, bullets and also about various gun injuries. Likewise, students were enlightened about the functioning of all the different departments. Being the only forensic department in Bangalore the lab holds great responsibility in maintaining standards. Various number of cases ranging from 100-200 are examined and maintaining transparency is utmost important. The work done by the police department in showing interest and maintaining integrity is commendable.

Activity Report

Title: Visit to JSD Techno Dental (CBCT centre)

Objective of the visit: To enhance knowledge in CBCT and its use in diagnosis in orthodontics which allows accurate three-dimensional imaging of hard tissue structures.

Date: 26/2/2021

Time : 12.30 pm to 2.30 pm

Location: JSD Techno Dental, Jayanagar, Bengaluru

Organized by: Department of Orthodontics and dentofacial Orthopedics

Participants: 1 staff in charge and 15 Post graduate students

Staff In charge: Dr. Laxmikanth SM

Brief Report:

On the 26th February 2021, the students of first year and second year MDS visited the JSD techno dental with the purpose of learning about CBCT procedure. During the visit, we saw the CBCT machine used. Also, the protocols followed for radiation protection for CBCT procedures. We were told about the software used, and the importance of the field of view. We receive a demonstration of the patient position. After a brief question and answer session, all our doubts were cleared. An interaction with the radiologist helped us in understanding the role and rise of CBCT procedures as a routine and adjunct diagnostic aid.

Activity Report

Title: Visit to American Smiles dental clinic

Objective of the visit: To create awareness in students about sleep Apnea and its importance in diagnosis in orthodontics

Date: 2/3/2021

Time: 3.30 pm to 5.30 pm

Venue: American smiles dental clinic

Organized by: Department of Orthodontics and dentofacial orthopaedics

Participants: 1 staff and 8 postgraduates

Speaker: Dr. Nivedita Kumar

Staff In charge: Dr. Anju Varughese

Brief Report: On 2nd March 2021, 2nd year postgraduate students of orthodontics visited the American smiles dental clinic (Snoring and sleep Apnea centre) to learn more about Obstructive sleep Apnea from Dr Nivedita Kumar. With the increase in awareness of sleep Apnea, and increased role of orthodontists in management, the students were keen on this visit. At the clinic, we learned about the different types of sleep Apnea. We saw different sleep Apnea charts and scores used in diagnosis. A demonstration of the oral appliances, with their indications and contraindications was given. The clinical procedures involved in recording of bite as well as the titration of these appliances were also demonstrated. Questions were encouraged about the various aspects of orthodontist's role in sleep Apnea. It was a wholesome experience.

Activity Report

Title: Visit to "Dentsply Sirona" St Marks Road Ashok Nagar, Bengaluru

Objective of the visit: To enhance knowledge of the existing as well as emerging maxillofacial imaging modalities, precisely being the latest combination of CBCT, OPG and Lateral CEPH machines in market along with its working soft wares.

Date: 20/4/2021

Time: 3:00 pm to 5.00 pm

Location: Dentsply Sirona St Marks Road Ashok Nagar, Bengaluru.

Organized by: Department of Orthodontics and dentofacial orthopaedics

Participants: 1staff in charge and 4 Post graduate students

Staff Incharge: Dr Anju Varughese

Brief Report: On the 20th April2021, the students of first year MDS visited the DENTSPLY SIRONA with the purpose of learning of the existing as well as emerging maxillofacial imaging modalities. A digitalized -visual method was adapted by our eminent speaker Dr. Hari Suresh Prabhu, a maxillofacial radiologist by profession and a specialist in imaging and CAD-CAM. A brief description was given about the different 2D-3D imaging models – comprising of CBCT, Lateral Cephs, OPG'S manufactured and maintained by Dentsply Sirona, a German based manufacturing company of dental products and technologies. Live demonstration of the working of the latest Orthophos Axeos CBCT machine, dental chair functioning, intra -oral scanners and CAD –CAM machines. A questionnaire session was conducted, in which the post graduates could raise their respective queries regarding the same.

Activity Report

Title: Visit to biotechnology department of The Oxford Science College, Bangalore.
Objective: To know about various equipment's, their functioning, uses and theoretical knowledge about the various laboratory procedures.

Date: 12-03-2021

Time: 11:00 am

Location: HSR Layout, Bangalore.

Organised by: Department of Pedodontics and Preventive Dentistry.

Participants: 8 Post Graduate Students of The Department of Paediatric and Preventive Dentistry

Speaker: Method adopted: Verbal Orientation and demonstration

Description: We visited Biotechnology Department of The Oxford Science College in Bengaluru on 12-03-2021 at 11 am. The orientation was delivered about the department. The laboratory was well equipped. We were thoroughly introduced to various equipment's like microscopes, incubators, spectrophotometer, autoclave, microcentrifuges, PCR tubes, electrophoresis chamber, flow cytometry, real time PCR and digital PCR. Functioning of the instruments was demonstrated.

As a dentist we should have the knowledge about the equipment's and procedures for investigation of various diseases. This field visit gave us the insight and functioning of various equipment's which help in various diagnostic procedures.

Activity Report

Title: Visit to the Metallurgical laboratory

Objective: To create awareness for the students about the importance of equipment's in the laboratory in dentistry.

Date: 20-03-2021

Time: 9:00 am to 4:00 pm.

Location: Electronic city, Phase 1, Bangalore.

Organised by: Department of Paediatric and Preventive Dentistry.

Method adopted: Verbal orientation on various instruments used in the metallurgical laboratory and their function.

Description: We visited ARML laboratory on 20-03-2021 at 10:30 pm. The laboratory was well equipped. The lab technician thoroughly described about various equipment's Optical Emission Spectrometry, equipment's to measure Vickers, Knoop and Brinell hardness and to test flexural strength of various materials and their functioning.

As a dentist we should know the physical properties of various dental materials for its use in clinical practice. This laboratory had equipment's which were used to measure hardness, strength and various physical properties. Thus, the lab technician gave a thorough knowledge about the equipment's and demonstrated its use.

Sl. No.	Student Names	Dissertation Topics
Department of Oral Medicine & Radiology		
1.	Dr. Sikha Poudyal	Comparison of effectiveness of curcumin and triamcinolone acetone in treatment of minor recurrent aphthous stomatitis
2.	Dr. Shabana Banu	Evaluation of stress levels and oral mucosal changes among corporate employees: A comparative clinical study
Department of Oral & Maxillofacial Surgery		
3.	Dr. Jerin Jose	Evaluation of the efficacy of sialic acid -a noninvasive biomarker in oral potentially malignant disorder and oral squamous cell carcinoma-a prospective clinical study
4.	Dr. Sindhu S Rao	Evaluation of the outcomes of the horizontal ridge augmentation and immediate implant placement in atrophic ridges using guided bone regeneration in ridge split technique - a prospective study
5.	Dr. Nayana R	Evaluation of correlation between Vit D levels and implant stability in Indian population - A prospective study in Bangalore
6.	Dr. Rekha S Nair	Comparative Evaluation of mechanical resistance after fixation of the mandibular condyle fracture with single and two mini plates- An Invitro study
7.	Dr. Akhil Sankar	Evaluation of the post operative morbidity in immediate loading of basal compression screw implants- A prospective study
8.	Dr. V V Nandita A R V Murthy	Microbiological examination to investigate the differences in microorganisms and antibiotic sensitivity of head and neck-odontogenic space infections- A prospective study
9.	Dr. Moitrayee Sharma	Comparative Evaluation of the marginal bone loss in one stage versus two stage implant placement- A Prospective study
Department of Conservative Dentistry & Endodontics		
10.	Dr. Preetham	Cone Beam Computed Tomographic Evaluation of Removal of Thermoplasticized Gutta Percha and Resin Sealer in Endodontic Retreatment Using Reciprocating and Rotary Systems
11.	Dr. Varsha	A Confocal Laser Scanning Microscopic Study to Compare the Effect of Conventional Needle Irrigation, Endoactivator and Laser Irradiation on Sealer Penetration into Dentinal Tubules - Invitro Study
12.	Dr. Durga	Evaluation of Apical Microleakage with Novel MTA Root End Filling Material in The Absence and Presence of The Blood -An In Vitro Study.

13.	Dr. Alisha	A Comparative Evaluation of Marginal Adaptation of Centionn, Zircomer and Amalgomer cr In Class li Box Cavityusinh Scanning Electron Microscope. An In Vitro Study.
14.	Dr. Jadeep	A Quantitative Analysis of Apical Debris Extrusion in Root Canal with Varying Root Canal Curvature Using Rotary and Reciprocating System-An In Vitro Study
15.	Dr. Charles	Canal Cleanliness and Smear Layer Removal Using Different Irrigation Activating System (Waterpik, Endoactivator, Manual Dynamic Agitation). A Scanning Electron Microscopic Study
16.	Dr. Prathyusha	An Invitro Evaluation of Antimicrobial Efficacy of Chlorhexidine Gel and Copaiba Oil as Intracanal Medicament Against Enterococcus Faecalis Using A Real Time Polymerase Chain Reaction (PCR)
17.	Dr. Mythili	Evaluation or Pericervical Dentin Stress with Different Access Cavity Design and Root Canal Taper in Mandibular Molar -A Finite Element Analysis
Department of Periodontics		
18.	Dr. Ankitha Menon	Correlation of Periodontal Ligament Associated Protein-1 And Tumour Necrosis Factor - Alpha Levels in Gingival Crevicular Fluid (GCF) And Serum in Periodontal Health and Diseased Subjects Before and After Treatment - A Clinico-Biochemical Study
19.	Dr. Athira Jayan	Correlation of Periodontal Ligament Associated Protein-1 And Tumour Necrosis Factor - Alpha Levels in Gingival Crevicular Fluid (GCF) And Serum in Periodontal Health and Diseased Subjects Before and After Treatment - A Clinico-Biochemical Study
20.	Dr. Jeenu Johnny	The Effect of Indocyanine Green Mediated Photodynamic Therapy on Gingival Crevicular Fluid Levels of TNF A And MMP 8 In Chronic Periodontitis Subjects Among Smokers Versus Non-Smokers - A Comparative Study
21.	Dr. Syed Abrar	Estimation and Comparison of Progranulin and TNF-A In Gingival Crevicular Fluid of Periodontal Health, Chronic Periodontitis Subjects with And Without Obesity Before and After Non-Surgical Periodontal Therapy
22.	Dr. Joyson Premkumar	Comparative Evaluation of Gingival Crevicular Fluid Levels of Interleukin 1 Beta and Substance P in Chronic Periodontitis Subjects with And Without Type 2 Diabetes - A Case Control Study

23.	Dr. Jyothi C	Estimation and Comparison of Gingival Crevicular Fluid Levels of Endocan and Tumor Necrosis Factor -A In Subjects with Chronic and Aggressive Periodontitis Before and After Non-Surgical Periodontal Therapy – A Clinico Biochemical Study
24.	Dr. Sruthi Devasia	Effect of Nonsurgical Periodontal Therapy on Gingival Crevicular Fluid (GCF) Levels of Matrix Metallo Proteinase (MMP)- 25 And (MMP)-26 Levels in Chronic Periodontitis and Aggressive Periodontitis Patients: A Clinico-Biochemical Study.
25.	Dr. Priyanka Das	Estimation and Comparison of Progranulin and C-Reactive Protein Levels in Gingival Crevicular Fluid of Health, Chronic Periodontitis with and Without Type 2 Diabetes Before and After Non-Surgical Periodontal Therapy
Department of Prosthodontics		
26.	Dr. Sasirekha	Comparative evaluation of flexural and impact strength of 3d printed and acrylic resin denture base materials – an in vitro study
27.	Dr. Nikitha Potluri	Compression of two surface sealants on surface roughness and colour stability of a commercially available denture base material –an invitro study
28.	Dr. Nandan Kumar	Effect of toothbrushing on surface roughness and shade changes on PFM disc and cad cam zirconia before and after tooth brushing- an invitro study
29.	Dr. Krishna T	Comparative evaluation of ion release from two different nickel chromium alloys in artificial saliva at various PH level- an invitro study
30.	Dr. Neethu	Comparative evaluation of stress distribution of zirconia, cobalt chromium and polyetheretherketone (peek) framework material on an atrophic maxilla in all on six implant treatment concept – a 3-dimensional finite element analysis.
31.	Dr. Dawa Sonam	Comparative evaluation of flexural and impact strength of 3d printed, CAD/CAM milled and conventional acrylic resin denture base materials – an in vitro study
32.	Dr. Sameer Vidyasagar	Occlusal equilibration using t-scan in treating temporomandibular joint disorder – disc displacement with reduction: an Invivo study.
