DEPARTMENT OF ORAL MEDICINE & RADIOLOGY

OSCE/OSPE

The course is based on three pillars: the patient visiting program, special problem-oriented seminars, and communication training for doctors. The essential goal consists of providing students with real patient contact right at the beginning of their study of dentistry, thus making the study of dentistry patient-based very early on. Students are trained in taking comprehensive anamneses and recording clinical findings. OSCE/OSPE gives a summative as well as formative assessment of the students.
