Effective leadership is reflected in various institutional practices such as decentralization and participative management.

Describe the organogram of the college management structure and its functioning system highlighting decentralized and participative management and its outcomes in the institutional governance.

College has active management system with decentralization to coordinate administrative and academic functions which is exemplified in a proper and well defined Organogram.

This includes Board of management (BOM), Governing council (GC), Dean / IQAC chairman, 8 criteria heads, Heads of departments, committees, faculties, students and other stake holders.

The BOM executes the action plan, decisions for overall upgradation of college. Dean is head of the institution and works along with Departments and criteria heads and enforces vision and mission of the College and the decisions of the Board.

IQAC is a prominent academic and administrative body, achieving quality of all the domains, focusing on maintaining and improving the quality of education.

It prepares Strategic Perspective Plan (SPP) with budgetary provisions consulting departments and submits to the GC. Once approved, then Dean organizes it with systemic empowerment strategies through stakeholders. The Parent Teachers Association (PTA) considers parent's views as important stakeholders are taken in to account.

In an organizational context, decision-making authority is deliberately distributed across various levels to improve overall efficiency and responsiveness. This decentralization enables faculty and staff to actively participate in academic and administrative decisions through committees and councils. As a part of decentralization, the Principal of TODC has identified the organizing committee comprising of different members to organize orientation programs and white coat ceremony for 2022-2023 batch. In particular, the cultural committee which is a part of the organizing committee has been given full responsibilities to plan the activities and make the events successful.

This inclusive approach not only empowers individuals but also promotes open communication and collaboration, fostering a strong sense of shared responsibility. Crucially, the decision-making process systematically considers input from a diverse range of stakeholders—faculty, staff, and students—ensuring that multiple perspectives contribute to well-informed and inclusive decisions.
