#### SOP FOR CONDUCT OF TRAINING PROGRAM

#### TOPIC: SEQUENCING A FULL MOUTH REHABILITATION -ANTERIOR OR POSTERIOR FIRST?

The purpose of this program is to educate the postgraduate students about the full mouth rehabilitation.

Through this program students will be able to gain basic knowledge on how to deal with full mouth rehabilitation cases. It allows individualised professional development for dentists and help in advancing their knowledge about these types of cases.

This program aims at making students familiar with the basics of full mouth rehabilitation, determine their level of interest for developing the concepts of full mouth rehabilitation during future clinical practice.

The students will be made well versed with the changing face of dentistry with advent and success that it will pave way to increasing their interest and would encourage them to specialise in same in future.

By end of this orientation program the participants will be able to gain knowledge with respect to full mouth rehabilitation and thus will be a great guiding source for them.

### Activity Report

**Date:** 19.08.2022

**Time:** 10:00 am- 2:30 pm

**Title:** "Sequencing a full mouth rehabilitation- anterior or posterior first?"

**Objective:** Delivering the knowledge about the full mouth rehabilitation cases.

**Location:** Seminar hall

**Organized by:** TODC, Student Guidance and Career Counselling Committee

**Audience:** Post graduates and Interns

**Speaker:** Dr. Sheetal B Saklecha

**Method adopted:** Theory and clinical discussion

**Description:** A detailed lecture was delivered by Dr. Sheetal B Saklecha on 19.08.2022 from 10-11 am.

The target audience was the post graduate students. The aim of the meeting was to delivering the knowledge about the basics of full mouth rehabilitation cases and to achieve clarity on when and how full mouth to be done with sequencing.

The program was followed by clinical cases discussion by the post graduate students, different cases with various scenarios and after which they were asked to give their feedbacks for the same.

**TOPIC :THE CURVE**

**"EDUCATION IS NOT THE LEARNING OF FACTS BUT TRAINING OF MIND TO THINK"  
-ALBERT EINSTEIN**

The Department will be conducting a CDE programme for post-graduate students by **Dr. Vinithra**. On the topic **"CBCT in endodontics"**

beam computed tomography (CBCT) is an extra-oral imaging system which produces 3-dimensional scans of the maxillofacial skeleton. It is useful in overcoming the limitations of conventional radiography. CBCT is a valuable aid in providing additional information for diagnosis and enabling more predictable management of complex endodontic problems compared to using intra-oral radiographs alone.

Ph: 080-61754680 Fax : 080 – 61754693E-mail:deandirectortodc@gmail.com

Website: www.theoxford.edu

## **OBJECTIVES :**

**The use of CBCT imaging in the diagnosis, treatment planning, and assessing the outcome of endodontic complications.**

- To obtain essential information in clinical endodontics, cone-beam computed tomographic (CBCT) imaging can be used in all phases of treatment including diagnosis, treatment planning, during the treatment phase, and through post-treatment assessment and follow-up. The purpose of this article was to review the use of CBCT imaging in the diagnosis, treatment planning, and assessing the outcome of endodontic complications.
- Currently, intraoral radiography is the imaging technique of choice for the management of endodontic disease, but CBCT imaging appears to have a superior validity and reliability in the management of endodontic diagnosis and complications.
- Endodontic cases should be judged individually, and CBCT imaging should be considered in situations in which information from conventional imaging systems may not yield an adequate amount of information to allow the appropriate management of endodontic problems. CBCT imaging has the potential to become the first choice for endodontic treatment planning and outcome assessment, especially when new scanners with lower radiation doses will be available.

### SOP FOR CONDUCT OF TRAINING PROGRAM

#### TOPIC: KICK-START YOUR OWN DENTAL PRACTICE

The purpose of this program is to motivate and educate the undergraduate students to kick-start their own dental clinic and the secrets of successful private practice.

Through this program students will be encouraged to practice dentistry as it allows individualised professional development for dentists and helps in advancing their knowledge in respective specialities in dentistry.

This program aims at making students familiar with the speciality, determine their level of interest for future training and demonstrate familiarity with different areas of dentistry.

The students will be made well versed with the changing face of dentistry with advent and success that it will pave way to increasing their interest and would encourage them to specialise in same in future.

By end of this orientation program the participants will be able to make wiser choices with respect to their profession and thus will be a guiding source for them.

## **SOP FOR CONDUCT OF TRAINING PROGRAM**

### **TOPIC: Composite Veneering**

The purpose of this program is to educate the postgraduate students about the Veneering using composite. Through this program students will be able to gain knowledge on newer material for veneering. It allows individualized professional development for dentists and help in advancing their knowledge about the use in these types of cases.

This program aims at making students familiar with the techniques used for veneering, determine their level of interest for developing the skills during future clinical practice.

The students will be made well versed with the changing face of dentistry with advent and success that it will pave way to increasing their interest and would encourage them to specialize in same in future.

By end of this program the participants were able to gain knowledge with respect to composite veneering and thus finding it a great guiding source for them.

**TOPIC : COMPOSITE VENEERING**

**"EDUCATION IS NOT THE LEARNING OF FACTS BUT TRAINING OF MIND TO THINK"  
-ALBERT EINSTEIN**

The Department will be conducting a CDE programme for post-graduate students by **Dr. Arun Jaysheel**. On the topic **"Composite Veneering"**

Composite resins have been advocated for decades as a means to conservatively restore minor, moderate and even large defects in teeth caused by decay or trauma. Their indication is predicated on the need to preserve as much healthy tooth structure as possible while using the synthetic composite resin materials to completely replace and augment lost to its structure by adhesive dentistry.

THE OXFORD DENTAL COLLEGE, BANGALORE

**OBJECTIVES : To obtain esthetic, form and function of the tooth**

Composite veneers are thin shells placed on teeth to correct their appearance, fix minor chips or cracks, or make minor corrections to tooth alignment. Made of composite resin, they're applied in a single appointment to match surrounding teeth.

- Composite resins are tooth-colored materials that can be applied to the remaining surfaces of teeth to replace lost tooth structure in such a way as to actually make them one, blending and exactly matching the physical characteristics and color of natural teeth and strengthening them in the process.
- Class I, II, and VI direct composite restorations are indicated for the restoration of primary caries lesions in the occlusal (Class I and VI) and proximal (Class II) surfaces of posterior teeth. When used in posterior teeth, direct composite will perform best in small- and moderate-sized restorations, preferably with enamel margins.
- Despite several advantages of composite restorations, there are some drawbacks such as polymerization shrinkage, postoperative sensitivity, no antibacterial activity, marginal deficiencies, and secondary caries that affect the success of composite restorations, particularly in posterior complex restorations.

## **Activity Report**

**Date:** 10/03/2023

**Time:** 10:00 am- 12:30 pm

**Title:** White coat ceremony

**Objective:** This program is to guide our clinical students to about the professional ethics

**Location:** Auditorium, TODC

**Audience:** III BDS students

**Chiefguest:** Dr.Kenneth F.H.Tan

**Description:** White coat ceremony is a programme organized by our college for the clinical students to guide them about the professional ethics .This event is conducted once the students enter into 3<sup>rd</sup> year, as they begin with their clinical journey. This programme was organized on 10<sup>th</sup> March 2023 in our college auditorium with almost 40 participants in this event .The programme began with lighting of lamp by all the dignitaries. Our principal Dr.Priya Subramaniam Prof and Head Dept of Pediatric and preventive dentistry addressed the students .The guest speaker of the day Dr.Kenneth F.H.Tan guided the students about the ethics ,patient management ,treatment procedures ,infection control protocols and communication skills. This was intended to provide students with well defined guide lines regarding the responsibilities of a clinician, as they transited from preclinical to clinic. The students were informed about the dress code ,and their responsibilities as a doctor towards the patients .The white coats were distributed to all the clinical students and the programme was concluded with vote of thanks and National Anthem.

## **Annual Report**

**2022-23**

Capacity-building is defined as the process of developing and strengthening the skills, instincts, abilities, processes and resources that organizations and communities need to survive, adapt, and thrive in a fast-changing world. An essential ingredient in capacity-building is transformation that is generated and sustained over time from within; transformation of this kind goes beyond performing tasks to changing mind sets and attitudes.

Career counselling is the process of guiding students on the path to self-discovery and self-realization, working with them patiently, supporting them as they weed out self-doubt and make surer decisions based on their interests, leading to long-term satisfaction with their choices and a life lived with purpose.

Career Guidance and Counselling is a comprehensive and developmental approach. It helps an individual in making and implementing informed educational and occupational choices.

Career Guidance is the guidance given to individuals to aid them in understanding their skills, abilities and potential that is important for advancing in their career path.

At institution level curriculum committee is constituted, Capability building and Skill Enhancement Committee and Student Guidance and Career Counselling Cell. It directs all the Departments to conduct courses. Each department identifies topics and organizes these courses that are either conducted by the faculty members of the department or the subject experts to bridge the gap between the curriculum and the requirements of the clinical practice. The college organizes special training sessions and the students are sensitized to various decisive skills like group discussions, better communication skills, presentation skills, writing skills and so on.

These courses are designed to augment the standard of the students Post Graduation. It is imperative for higher education institutions to complement the future after finishing the course to make students better prepared to meet industry demands as well as nurture their own interests and aptitudes. Based on the Feedback, given by stake holders, alumni, students, industry, and employer various capability building courses were offered by the institution to impart knowledge, and life skills.

The committee succeed in more courses than previous years and courses. These courses have empowered them to refocus on the Subject they have studied and build confidence in upgrading their clinical skills. The following are the programs for the year 2022-2023

## **White coat ceremony**

White coat ceremony is a programme organized by our college for the clinical students to guide them about the professional ethics .This event is conducted once the students enter into 3<sup>rd</sup> year, as they begin with their clinical journey. This programme was organized on 10<sup>th</sup> March 2023 in our college auditorium.The programme began with lighting of lamp by all the dignitaries. Our principal Dr.Priya Subramaniam Prof and Head Dept of Pediatric and preventive dentistry addressed the students .The guest speaker of the day Dr.Kenneth F.H.Tan guided the students about the ethics ,patient management ,treatment procedures ,infection control protocols and communication skills. This was intended to provide students with well defined guide lines regarding the responsibilities of a clinician, as they transited from preclinical to clinic. The students were informed about the dress code, and their responsibilities as a doctor towards the patients.
