

Institutional social responsibility activities in the neighbourhood community in terms of education, environmental issues like Swachh Bharath, health and hygiene awareness, delivery of free/subsidized health care and socio economic development issues carried out by the students and staff including the amount of expenditure incurred during the last five years

Social responsibility is an ethical framework that suggests that individuals have a duty to act in the best interests of their environment and society as a whole. This benefits society at large. Social commitment is an essential part of the college's vision, and students play a vital role in achieving it. By educating and nurturing students, we can help them develop their social responsibility and become better citizens of India. Integrated learning and holistic development of students can be achieved through student and faculty orientation programs. By educating and nurturing students, we can help them develop their social responsibility and become better citizens of India. Integrated learning and holistic development of students can be achieved through student and faculty orientation programs.

The college strives to instill social responsibility in its students through various programs and initiatives. These initiatives aim to make students more sensitive and responsible citizens. The college provides oral care to the needy in rural areas through satellite clinics, dental camps, and a mobile unit. It also provides free transport to patients from nearby villages and subsidizes or provides free oral health services to economically weaker sections of the society. The college also celebrates events to create awareness and promote positive interaction among students.
