Criteria 7- Institutional Distinctiveness

The Oxford Dental College and Hospital (TODC) is committed to providing stakeholders with a comprehensive education by embracing cutting-edge, research-based methods. Additionally, TODC works to offer standardized dental care. People from many walks of life come to The Oxford Dental College and Hospital with the hopes of getting the best care possible. Indeed, the tireless efforts of dedicated physicians, postgraduate students, and the entire college staff ensure that they receive justice. Patients are directed to several departments as soon as they arrive, beginning with radiology and oral medicine before arriving at the crucial department where their issue is resolved. By lowering out-of-pocket costs, the medical services are offered at a fair price and improve patients' quality of life.

Twice a week, mobile dental clinics are set up to serve patients in rural areas. The Central Jail inmates are served by the eager Public Health department staff and postgraduate students who accompany the UG dental students. This team toured the most underprivileged villages and gave them high-quality dental care. In facilities such as the Oxford Medical Hospital and the Jayadeva Institute of Cardiovascular Sciences, postgraduate students are exposed to medical knowledge that allows them to pursue integrated health education in parallel. The best doctors are produced thanks to these postings. Additionally, many cardiac patients receive dental care while they are admitted to the hospital, which lessens the patients' discomfort. The Oxford Dental College and Hospital's mission is to offer the community with high-quality oral health treatment, and all staff members work hard to achieve this goal while also increasing community outreach and raising awareness of oral health issues.

Our college is distinguished by providing excellent care at a reasonable price. Patients have profited from our in-house aligner treatment and platelet-rich fibrin therapy so far in 2023. Patient education initiatives such as Orthodontic Week, which dispels public misconceptions through role-playing and in-person instruction, are part of patient outreach. As a result, more patients are visiting The Oxford Dental College and Hospital for orthodontic consultations.
