ACTIVITY REPORT

"Mastering Advanced Implantology - A Surgical Workshop"

Title:- Mastering Advanced Implantology - A Surgical Workshop Objective:- To train dental graduates, post-graduates and practitioners in the essential skills of advanced implantology
Date:- 27th and 28th March 2024 Time - 9.00 am onwards Location - College Auditorium, The Oxford Dental College Organised by - Department of Oral and Maxillofacial Surgery Participants:- Registered participants - students, faculty and practitioners from various colleges and clinics across Asia. Organizing Chairman:- Dr Harish Kumar A, Professor and Head, Department of Oral and Maxillofacial Surgery, The Oxford Dental College.

Description

The Department of Oral and Maxillofacial Surgery, The Oxford Dental College, Organised a 2-day programme, "Mastering Advanced Implantology - A Surgical Workshop" on the 27th and 28th of March, 2024. A total of 132 registrations from undergraduate students, post-graduate students, faculty, and practitioners from dental colleges and clinics across Asia were received. The workshop included lectures, live demonstrations and hands-on sessions on advanced implantology procedures like maxillary sinus lift, ridge augmentation procedure to name a few, by highly experienced resource persons. The delegates participated actively in all sessions and benefited from the didactic and demonstrative sessions, ultimately concretizing their learnings through hands-on opportunities. The feedbacks collected from the delegates has been highly appreciative and motivating for the organizers.

How relevant was the content discussed by the speaker?

65 responses

Program outcome.

The program began with a foundational overview of dental implants. The basics of implant materials, placement techniques, and osseointegration were discussed. Advanced procedures were then explored, including sinus augmentation and ridge expansion. Sinus lift procedures were covered in detail, addressing various techniques and indications. A hands-on workshop using goat heads provided practical experience and better understanding. Ridge expansion procedures were demonstrated using specialized instruments. Implants were placed in the hands-on session, showcasing the step-by-step process. The first day concluded with a panel discussion where experts shared their insights and experiences. The program also emphasized the importance of soft tissue management in implant dentistry. The management of gingival complications and the role of soft tissue grafts were discussed. The balance between hard and soft tissue procedures was highlighted. The program aimed to equip participants with comprehensive knowledge of implant dentistry. By combining theoretical knowledge with practical experience, participants gained valuable skills. The program's focus on both hard and soft tissue aspects ensured a well-rounded understanding. Overall, the program provided a valuable learning opportunity for dental professionals interested in implant dentistry.
