DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

Steps taken to measure the competencies or outcomes

1. The Student is trained to perform a comprehensive history taking, thorough clinical examination, knowledge of relevant hematological, microbiological, biochemical investigations and integrate the applied medical sciences with oral diseases.
2. Develop competencies to assimilate clinical findings, establish a diagnosis, assess prognosis and formulate a comprehensive treatment plan.

All undergraduate students are expected to perform the following at the expected level of general dental practice

- i. Collect and organize appropriate clinical data of the patients including a complete case history, physical examination, intraoral examination and laboratory tests.
 - ii. Establish the clinical diagnosis
 - iii. Formulate and implement the acceptable treatment modalities
 - iv. Implement the oral disease preventive measures and patient education
 - v. Involve the patients in decision making and obtain patients consent to perform the procedures
 - vi. Demonstrate the knowledge on production of x-rays and the biological effects of radiation
 - vii. Apply the quality assurance protocol in radiology practice
 - viii. Take diagnostically acceptable intra oral periapical radiographs and bite wing radiographs by using appropriate techniques
 - ix. Follow the principles of radiographic interpretation and identify the normal structures and pathological conditions
 - x. Interpret the intra oral radiographic images, make radiodiagnosis and integrate the findings with clinical examination to derive the final diagnosis and treatment plan.
3. Understand principles of therapeutics and effectively practice current evidence based practice in medical management of common maxillofacial disorders.
 4. Have knowledge of various imaging modalities of diagnostic use in Orofacial region. Develop competency to independently perform and report the imaging findings of 2D intra oral, panoramic and small FOV CBCT images
 5. Understand the oral health – systemic health link, diagnose oral changes due to systemic disorders and formulate comprehensive dental treatment for medically complex patients.

Curriculum of Dental Internship Programme according to Dental Council of India:

General Guidelines:

1. It shall be task-oriented training. The interns should participate in various institutional and field

programmes and be given due responsibility to perform the activities in all departments of the Dental

Colleges and associated Institutions.

2. To facilitate achievement of basic skills and attitudes the following facilities should be provided to all

dental graduates:

i) History taking, examination, diagnosis, charting and recording treatment plan of cases.

ii) Presentation of cases in a group of Seminar.

iii) Care and sterilization of instruments used.

iv) Performance and interpretation of essential laboratory tests and other relevant investigations.

v) Data analysis and inference.

Administrative Office,
1st Phase, J.P. Nagar, Bangalore-560 078.
Ph: 080-26659532, 61754501/02 | Fax: 080 - 26548658

THE OXFORD DENTAL COLLEGE

Accredited with 'A' grade by NAAC

(Recognized by the Govt. of Karnataka, affiliated to Rajiv Gandhi University of Health Sciences,
Karnataka & Recognized by Dental Council of India, New Delhi)

Bommanahalli, Hosur Road, Bangalore - 560 068.

Ph: 080-61754680 Fax: 080 - 61754693

E-mail: deandirectortodc@gmail.com Website: www.theoxford.edu

vi) Proper use of antibiotics, anti-inflammatory and other drugs, as well as other therapeutic modalities.

vii) Education of patients, their relatives and community on all aspects of dental health care while

working in the institution as also in the field.

viii) Communication aimed at inspiring hope, confidence and optimism. ix) Legal rights of patients and

obligations of dental graduate under forensic jurisprudence.

During their posting in Pediatric and Preventive Dentistry the Dental graduates (INTERNS) shall perform:

1. Topical application of fluorides including varnish - 5 Cases
2. Restorative procedures of carious deciduous teeth in children - 10 Cases
3. Pulpotomy - 2 Cases
4. Pulpectomy - 2 Cases
5. Fabrication and insertion of space maintainers - 1 Case
6. Oral habit breaking appliances - 1 Case

DEPARTMENT OF ORAL AND MAXILLOFACIAL PATHOLOGY & ORAL MICROBIOLOGY

Department follows objective structured practical examination (OSPE) for assessment. The assessment is based on the following:

YEAR	ASSESSMENT	MARKS	TOTAL
I Year	Carving geometric forms, permanent teeth both of upper and lower arch on Wax block	30 marks	90 marks
	Identification of oral and paraoral histology slides and ground sections	39 marks	
	Identification of deciduous and permanent teeth	12 marks	
	Identification of cast specimen	9 marks	
III Year	Identification of microscopic slides of various oral lesions	60 marks	90 marks
	Identification and points in support of hard and soft tissue specimens – Tooth anomalies and cast specimens	30 marks	

Steps taken to measure the competencies or outcomes:

Formative evaluation is done through a series of tests and examinations conducted periodically by the department

Summative evaluation is done by the university through examination conducted at the end of the 1st and 3rd year BDS

METHODS TO EVALUATE COMPETENCIES:

Evaluation may be achieved by the following tested methods:

1. Class test
2. Internal Written exams
